EDU 305 — Past Questions & Materials

by Renance

Course: EDU 305

Institution: College of Education, Warri

Papers in this pack: 1

Levels: 300

This study pack was compiled and restructured by Renance for EDU 305 students at College of Education, Warri. It brings together 1 past paper(s)/material(s) into one clean, readable document so you can revise without chasing scattered PDFs. Practise these same questions interactively on Renance with instant answers, AI explanations, and full CBT mock exams — over 235,000+ questions across JAMB, Post-UTME, WAEC, NECO and university courses.

Paper 1 of 1 — EDU 305 - 2022/2023 - First Semester - EDUCATIONAL STATISTICS

Level 300 • First Semester • PastQuestion

This source paper is a scanned document; its pages are reproduced below.

**COLLEGE OF EDUCATION, WARRI
IN AFFILIATION WITH
DELTA STATE UNIVERSITY, ABRAKA
REGULAR DEGREE PROGRAMME
FIRST SEMESTER EXAMINATION, 2022/2023 ACADEMIC SESSION
COURSE CODE: EDU. 305**

COURSE TITLE: EDUCATIONAL STATISTICS

DEPARTMENT: EDUCATIONAL PSYCHOLOGY TIME: 2 HOURS

INSTRUCTION: ANSWER QUESTION ONE AND ANY TWO (2) OTHER QUESTIONS

1. (a) Differentiate between the following terms:
- (i) Teacher-made test and standardised achievement test
 - (ii) Descriptive statistics and inferential statistics
 - (iii) Checklist and rating scales
- (b) The following was obtained from an end of term examination for two students, A and B

Students	Raw Scores	Mean Score	Standard Deviation
A	41	68	3
B	85	52	4

- (i) Compute the T - score for each student
 - (ii) Which of the students performed better?
2. (a) Mention and explain two sources of statistical data
- (b) Explain with illustration; frequency distribution as a method of presenting statistical data
- (c) Below is frequency distribution scores obtained in a Chemistry test

Class Interval	Frequency
60 - 64	2
55 - 59	3
50 - 54	5
45 - 49	6
40 - 44	10
35 - 39	16
30 - 34	27
25 - 29	19
20 - 24	10
15 - 19	2

- (i) Calculate the median of the distribution
 - (ii) What is the range of the distribution?
3. (a) Define statistics
- (b) Explain the following
- (i) Measures of variability
 - (ii) Aptitude test
- (c) Below are the scores of students in a test:

46	20	61	31	20	31	34	20	29	22	23
29	22	31	21	32	29	44	24	38	21	55
22	40	45	55	43	30	22	29	53	59	20
32	24	42	36	48	20	26	50	23	47	28
43	57	21	29	46	37	20	55	30	27	33

- (i) Construct a frequency table for the above data, using a lower class interval of 18 - 22
- (ii) Compute the mean score of the distribution using the raw score formula
- (iii) What is the mode of the distribution?
4. (a) Explain with illustration:
- Normal curve
 - Positively skewed curve
 - Negatively skewed curve
- (b) State two conditions that gives rise to each of 4 (a) (i) and (ii) above
- (c) Given the following distribution of scores

X	F
20	1
18	1
17	3
16	2
14	4
12	5
11	6
9	4
7	3

Calculate the following

- Mean
 - Standard deviation
 - Variance
5. (a) Differentiate between a bar chart and histogram
- (b) State four levels of measurement in statistics and explain two with concrete examples
- (c) The following are the scores of 10 students in Mathematics and statistics respectively

Mathematics	Statistics
31	26
16	11
6	16
21	41
21	11
26	26
31	41
26	26
21	31
11	26

- Compute the Pearson product moment correlation co-efficient (r) for the above data using the raw score method
