

RENANCE

FEDERAL UNIVERSITY OF PETROLEUM RESOURCES, EFFURUN

BIO 101 — Past Questions & Materials
by Renance

Course: BIO 101
Institution: Federal University of Petroleum Resources, Effurun
Papers in this pack: 1
Levels: 100

This study pack was compiled and restructured by Renance for BIO 101 students at Federal University of Petroleum Resources, Effurun. It brings together 1 past paper(s)/material(s) into one clean, readable document so you can revise without chasing scattered PDFs. Practise these same questions interactively on Renance with instant answers, AI explanations, and full CBT mock exams — over 235,000+ questions across JAMB, Post-UTME, WAEC, NECO and university courses.

Paper 1 of 1 — BIO 101 GENERAL BIOLOGY11 2022,2023

Level 100 • First Semester • PastQuestion

FEDERAL UNIVERSITY OF PETROLEUM RESOURCES

- COLLEGE OF SCIENCE ,

DEPARTMENT OF ENVIRONMENTAL MANAGEMENT AND TOXICOLOGY

SECOND SEMESTER 2022/2023 DEGREE EXAMINATION

BIO 121: General Biology II (3 units) , Time; 1 hour

INSTRUCTION: Answer all questions -

OPTION D

1. Which of the following accurately completes the classification: Xiphosura, Arachnida, Crustaceae, Chilopoda, Diplopoda, Spirobolus and __ -. A. Hexopoda B. Nanopoda C. Pentapoda D. Limulus
2. Which is an example of class Holothuroideae? A. Sea cucumber B. Rhizocrinus C. Antedon D. Echinocardium
3. The sudden change in genetic makeup either in gene or chromosome resulting in a new characteristic that can be inherited is __. A. Ecology B. Homologous C. Mutation D. Genetic
4. The study of fish is known as __. A. Fishery B. Ichthyology C. Zoology D. Aquaculture
5. The series of changes organisms had undergone in response to. changes in environment since beginning of life is __. A. Hormonal changes B. Adaptation C. Organic Evolution D. Mutation.
6. The position an animal occupies in a habitat is called __. A. Niche B. Product C. Place D. Position
7. The most primitive group of fish are __. A. Jawless fish B. Bony C. Cartilaginous fish D. Lung fish
8. The long preserved remains of organisms that once lived are __. A. Fossils B. Vestigial organs
'C. Embryos D. Homologous organs
9. The idea of evolution did not originate from Charles Darwin A. True B. False C. Undecided D. Decided
10. The following are the types of fish mouth except ... A. Narrow B. Superior C. Terminal D. Inferior
11. The first living organism is believed to have evolved from __. A. Fossils B. Molecules C. Soil D. Plants '
12. The dermis of a cartilaginous fish is covered by __ __. A. Ctenoid scales B. Overlapping scales C. Ganoid scales D. Placoid scales
13. The dermis of a bony fish is covered by __. A. Ctenoid scales B. Overlapping scales C. Ganoid scales D. Placoid scales
14. The class Pisces is classified into order ____ and __ __. A. Chondichthyes and osteichthes B. teichthés and crinoideae C. crinoideae and chondrichthyes D. cucumaria and osteichthes

15. The body of a living organism consists of two parts A. Somatic and excretory B. Somatic and reproductive C. Reproductive and dermal D. Reproductive and cultural.
16. The body of a fish is divided into OA. 'Head and tail B. weech trunk and tail C. Head and body D. Head, thorax and abdomen
17. The balance of nature is one of the guides to the study of ecology. A. Predation B. Species C. Interaction D. Animal i 7
18. The Amphibians are divided into ___ orders namely ___. A. 4 orders, namely: Apoda, Urodela, Anura and thynchocephalia B 3 orders, namely: Apoda, Urodela and Anura C. 2 orders, namely: Anura and Apoda D. 5 orders, namely: Rhynchocephalia, testudines, Apoda, Urodela and Anura
19. The ___ is the fourth most abundant element in living organisms. A. Carbon B. Nitrogen C. Water D. Gas
20. Terrestrial biome include ___. A. Rain forest B. Water forest C. Upper forest D. Lower forest
21. Secondary consumers get their energy directly from ___ consumers. A. Tertiary B. Decomposers C. Primary D. Hawks
22. Phylum Chordata is divided into subphyla ___ subphyla. A. 3-subphyla B 4 subphyla C 5 subphyla D. 6
23. Phylum Annelida has 4 classes namely ___. A. Polychaeta, oligochaeta, hirudinea and Archiannelida B, Polychaeta, phasmida, secernentea and oligochaeta C. Hirudinea, Aphasmda, adenophorea and oligochaeta D. Oilgochaeta, archiannelida, polychaeta and secernentae
24. Organisms develop new organs or modify existing organs as environmental problems arise i.e organs change as the need arises was put forward by _ = _. A. Larmack B. Darwin C. Mendel D. Margulis. : 5
- "25. One of these scientists believed that species change over time i.e organisms change over long time period. A. Larmack B. Darwin C. Mende] D. Hooke
- 26, One of these is a vestigial organ. A. Colon B. Forelimb C. Appendix D. Hindlimb
27. One of these is a homologous structure A. Appendix B. Forelimb C. Fore head D, Colon
28. Modern theories of evolution based on the following except ___. A. Ecology B. Cytology C. Physiology D. Geology.
29. In earthworm, the body shows a pattern called ___ segmentation. A. metaphysis B. metamatrix C. metalocomotive D. metameric °
30. Heterotrophs are also known as ___. A. Family B. Consumers C. Ecosystem D. Animal
31. Food web is a whole system of connected ___ chains. A. Animal B. Bird C. Apex D. Food
32. Fish produce ___ by moving components of their skeletal system. A. Swimming B. Stridulating sounds C. Sounds D. Noise

33. Fish is not a single clade but ____. A. Paraphyletic B. Multinational C. Multiple D. Multiphyletic
- 2
34. Fish is classified traditionally into _____. Classes. A: 6 B. 5C.10D.8
35. Fish communicate in their environment through _____. A. Acoustic communication B. Singing © Movement D. Swimming ° nae é
36. Fish are gill-bearing ____ mammals. A. Craniate B. Skull C. Fins D. Limbs
37. Fish are a sister group to _____. A. Tunicates B. Amphibians C. Reptiles D. Aves
38. Fish are a diverse group of vertebrates with over _____. species A. 33000 B. 23000 C. 10000 D. ~ 15000
39. Examples of class Trematoda are the following except _____. A. Fasciola hepatica B. Diplozoon C. Otoplana D. Paragonimus heterotremus :
40. Examples of class Echinodeae are the following except _____. A. Sea urchin B. Cidaris C. Arbacia D. Cucumaria
41. Decomposers are the fungi and _____. A. Bacteria B. Fish C. Ecosystem D. Plants.
42. Coelenterates exhibit _____ level of organization. A. Cellular B. Tissue C. Organ D. Organ system
43. Classification of animal kingdom is based on various fundamental features, except _____ a ee Revels of organization B. Body symmetry C. Skeletal anatomy D. Diplomatic and triploblastic organization
44. Class Asteroideae, Ophiuroideae, Echinoideae, 'Holothuroideae and Crinoideae belongs to _____ phylum? A. Phylum Chordata B. phylum Echinodermata C. phylum Mollusc D. phylum Arthropoda
45. Cartilaginous fish produce _____. A. Fins B. Few large yolky eggs C. Many small eggs with little yolk D. Cloaca
46. Cartilaginous fish possess the following except _____. A. Fins B. Gills C. Swim bladder D. Cloaca
47. Carrying capacity is the _____. A. Minimum number of organisms an area can support. B. Maximum number of organisms an area can comfortably support without depletion C. Available resources D. Dry weight of living organism.
48. Calcarea, Hexactinellida and Demospongiae belongs to phylum _____. A. Phylum Molluscs B. phylum Porifera C. phylum Cnidarian D. phylum Echinodermata
49. Bony fish has the following except _____. A. Fins B. Gills C. Swim bladder D. Cloaca
50. Autotrophs are also referred to as _____. A. Abiotic B. Biotic C. Producers D. Consumers
51. Animals possessing coelom or body cavity are called _____. A. Mesoderm B. Body cavity C. Coelomates D. Ectoderm
52. Animal ecology concerns the relationship between _____ and their environments. A. Goat B. Plants C. Growth D. Animal
53. An example of classes Turbellaria is _____. A. Taenia spp B. convolute C. Diplozoon D. planaria

_ A. Monkey B. Whale C. Fish D. Water

+54. An example of animal found in tropical rain forest is __ _.

= 55. All vertebrates are from a common ancestor A. True B. False C. Undecided D. Decided

6. Abiotic component include ___. A. Salinity and pH B. Filter feeder C. Zooplankton D. Algae
: se

57. A scientist that disagreed with the theory of acquired inheritance was ___. A. Mendel- B. Dujardin C. August Weismann D. Schwann

58. A forest is an example of . A. Adapted B General C. Biome D. Composition

59. A is a group of communities that share similar environmental characteristics they exist in. A. Desert B. Forest C. Ocean D. Biome

60. ___ theory is still in use till today. A. theory of modification B. theory of acquired inheritance C. theory of origin and change D. theory of use and disuse

61. ___ mouth is used to crush hard shells of invertebrates A. Beak B. Protrusible C. Sucker D. Elongated : : j

62. ___ mouth has both jaws of same length A. Protrusible B. Terminal C. Sucker D. Beak

63. ___ is a type of fish shape. A. Round B. Flat C. Long D. Fusiform

64. ___ is a source of phosphorus. A. Growth B. Roots C. Fertilizer D. Fire

65. ___ is a linear sequence of organisms through which nutrients and energy are preceel A. Food web B. Food chain C. Food energy D. Food pyramid

66. ___ have the largest mouths A. Lungfish B. Sharks C. Whales D. Predatory fish

67. ___ gas is released to the atmosphere by autotrophs during photosynthesis. A. Water B. Energy C. Oxygen D. Powerful

68. ___ can be release into the environment by the combustion of fossil fuels. A. Nitrogen B. Plant C. Water D. Rock

69. ___ are the Biotic components of an ecosystem. A. Stone B. Non-living things C. Living things D.

Nutrient s

70. ___ and ___ are similar in many animals A. Cells and Tissues B. Enzymes and Hormones C. Organs and Systems D. adaptation and changes.
