Paper 1 of 1 — CSC 111: INTRODUCTION TO COMPUTER SCIENCE 1 ST SEMESTER TEST 2015/2016

Level 100 • First Semester • PastQuestion

FEDERAL UNIVERSITY OF PETROLEUM RESOURCES EFFURUN

DEPARTMENT OF MATHEMATICS/COMPUTER SCIENCE

CSC 111: INTRODUCTION TO COMPUTER SCIENCE

1ST SEMESTER TEST

2015/2016 ACADEMIC SESSION

1. Draw a Flowchart and Write a QBasic Program for a simple ATM machine that meets the following requirements
 - a. A user has three (3) attempts to enter a correct PIN. Whenever an incorrect PIN is entered, the program should display the message. "Sorry, this pin is invalid" and input the pin again
 - b. If a correct PIN is not provided on the third attempt. The program should display "Sorry, please you area having problems and terminate.
 - c. Once a valid PIN is entered, the program should prompt the user to choose whether to withdraw or check balance. If the user chooses to withdraw, then the program would display "WITHDRAWAL SUCCESFUL" and terminate. However if the user chooses to check balance, then the program would display "ACCOUNT BALANCE CHECKED" and terminate

NOTE: Assume that the valid PIN is always 5156

2. There are two major categories of storage devices, namely primary and secondary storage devices. Which would you compare with INPUT statement in QBasic and why?
3. A Computer technician recently bought a new Flash drive and found some files inside it. He created a folder in the flash named "ROM" and put all those files in it. He could have given the folder any other name and it would have been valid. From your knowledge about ROM as a storage device, what would motivate the technician to name the folder as ROM instead of any other name?
