

RENANCE

FEDERAL UNIVERSITY OF PETROLEUM RESOURCES, EFFURUN

GST 112 — Past Questions & Materials
by Renance

Course: GST 112
Institution: Federal University of Petroleum Resources, Effurun
Papers in this pack: 11
Levels: 100

This study pack was compiled and restructured by Renance for GST 112 students at Federal University of Petroleum Resources, Effurun. It brings together 11 past paper(s)/material(s) into one clean, readable document so you can revise without chasing scattered PDFs. Practise these same questions interactively on Renance with instant answers, AI explanations, and full CBT mock exams — over 235,000+ questions across JAMB, Post-UTME, WAEC, NECO and university courses.

Study online: renance.app
Get the app: Google Play — [dev.renance.renance](https://play.google.com/store/apps/details?id=dev.renance.renance)

Paper 1 of 11 — GST 112

Level 100 • First Semester • PastQuestion

This source paper is a scanned document; its pages are reproduced below.

19. The strongest evidence that comets are members of our solar system comes from _____.
(a) Their composition (b) Their effect on the lives of man (c) The shape of their orbits (d) The shape
length of their tails
20. Which of the following planets of the solar system has the longest day? (a) Mercury (b) Jupiter
Venus (d) Earth
21. Super Nova is _____. (a) An asteroid (b) A black hole (c) A comet (d) A dying star - exploding star
22. The number of satellite of mercury is/are A. 0 B. 1 C. 2 D. 16
23. In 1610, Galileo Galilei discovered four moons of which planet? (a) Saturn (b) Jupiter (c) Neptune (d)
None of these
24. On which of the following planets of the solar system does the sun rise in the west and set in the east? (a)
Venus (b) Mars (c) Jupiter (d) Saturn
25. Which two planets of the solar system have no satellites? (a) Mercury and Venus (b) Venus and Mars (c)
Mercury and Mars (d) Venus and Neptune
26. The outermost layer of Sun is called- (a) Convection zone (b) Photosphere (c) Chromosphere (d) Corona
27. Which of the following is the largest of the inner planets? (a) Venus (b) Mercury (c) Mars (d) Earth
28. Which planet is considered as the Dwarf planet? (a) Earth (b) Jupiter (c) Pluto (d) Saturn
29. Which one of the following statements is correct with reference to our solar system?
(a) The Earth is the densest of all the planets in our solar system (b) The predominant element in the
composition of Earth is silicon (c) The Sun contains 75 percent of the mass of the solar system (d) The
diameter of the Sun is 190 times that of the Earth
30. The orbits of planets around the Sun, or of satellites around the Earth, can be _____. (a) Circular and elliptic
(b) Circular and hyperbolic (c) Elliptic and parabolic (d) Parabolic and hyperbolic
31. Asteroids have their orbits between the planets _____. (a) Mercury and Venus (b) Earth and Mars (c) Mars and
Jupiter (d) Jupiter and Saturn
32. The planets are kept in motion in their respective orbits by _____. (a) Their great size and spherical shape (b)
The rotation and density (c) Gravitation and centrifugal force (d) Rotation of the sun on its axis
33. Comets move around the _____. (a) Earth (b) Venus (c) Sun (d) Jupiter
34. The time required by moonlight to reach the earth is _____. (a) 1 sec (b) 1.3 sec (c) 2 sec (d) 2.3 sec
35. Which is the brightest planet of the solar system? (a) Jupiter (b) Mercury (c) Uranus (d) Venus
36. Which is the hottest planet in the solar system? (a) Jupiter (b) Saturn (c) Venus (d) Uranus
37. Which one of the following planets takes the same number of days for rotation and revolution? (a) Mars
(b) Venus (c) Mercury (d) Jupiter
38. The four largest planets of the solar system in descending order are
(a) Jupiter Mercury Saturn and Uranus (b) Mercury Jupiter Saturn and Neptune (c) Jupiter Saturn Uranus
and Neptune (d) Jupiter Mercury Saturn and Neptune
39. The rotation of the Earth gives the (a) winter season (b) autumn season (c) day and night (d) summer
season
40. The rotation in which Earth rotates is from _____. (a) west to east (b) east to west (c) north to south (d) south to
north
41. The two halves in which Earth is divided are called, (a) ridges (b) trenches (c) equators (d) hemispheres
42. The outermost layer of the Earth is (a) asthenosphere (b) crust (c) trench (d) ridge
43. The inner core of the Earth is made up of (a) copper (b) iron (c) nickel-iron (d) alloy platinum
44. The division of cores of the Earth includes (a) inner core (b) tectonic core (c) outer core (d) both a and c
45. The theory which states that the plates of earth are continuously moving is classified as (a) The Trench
Drift theory (b) The Sphere Drift Theory (c) The Continental Drift Theory (d) The Oceanic Drift Theory
46. The chemical substance used to destroy the weeds in crops is called (a) herbicides (b) monoxides (c)
carb-oxides (d) pesticides
47. Besides the forest fires as natural source of pollution, the other major sources of pollution are (a) zonal
settlement patterns (b) human activities (c) falling of meteoroids (d) nucleated settlement patterns
48. The natural source of pollution is (a) rain forest (b) mining for minerals (c) forest fire (d) falling of
meteoroids

- (1) 20/11/2019 11:23:12
49. The harmful substance released by power plants and cars is (a) carbon dioxide (b) oxygen (c) potassium (d) magnesium
 50. The kind of land pollution in which salt content rises and land becomes unsuitable for farming is called (a) carbonization of soil (b) deoxygenation of soil (c) salinization of soil (d) oxygenation of soil
 51. In which of the following countries would you expect material lifestyles to be most like those in the United States? (a) Nigeria. (b) Japan. (c) India. (d) Mali.
 52. The poorest region of the world is (a) the Middle East (b) sub-Saharan Africa. (c) Asia. (d) Latin America.
 53. Which of the following are not third-world regions? (a) Latin America. (b) Asia. (c) Africa. (d) Australia.
 54. Which of the following characteristics are most likely found in developing countries? (a) high population growth rates. (b) large number of people living in poverty. (c) very traditional methods of agriculture. (d) all of the above
 55. Two elements in group I of the periodic table are: (a) lithium and sodium (b) Nitrogen and oxygen (c) Sodium and Nitrogen (d) Helium and Hydrogen
 56. Two group 4 elements of the periodic table are (a) Titanium and Zirconium (b) Hafnium and Boron (c) Boron and Zirconium (d) Carbon and Rutherfordium
 57. Inert elements in the periodic table typically belong to which group? (a) VII (b) III (c) IV (d) VIII
 58. Argon is an element in group ____ of the periodic table (a) I (b) II (c) 0 (d) IV
 59. Groups containing alkaline earth metals are (a) IA (b) IIIA (c) IIA (d) IVA
 60. Ability of an atom to attract electrons towards itself is called (a) Electron affinity (b) Electronegativity (c) Ionization energy (d) Shielding effect
 61. As we go from left to right across a period, electron affinity (a) increases (b) decreases (c) remains same (d) None of the above
 62. Australopithecus was also known as the ____ (a) first ape man (b) first human (c) human baby (d) humanoid
 63. Which of the following is the correct statement regarding Australopithecus? (a) they lived in African grasslands (b) they lived about 5 - 6 million years ago (c) they essentially ate fruits (d) they heated with gums
 64. Which fossil of an ape was known as the connecting link between apes and man? (a) Ramapithecus (b) Dryopithecus (c) Sivapithecus (d) Australopithecus
 65. What is another name of human evolution? (a) Neogenesis (b) Anthropogenesis (c) Metagenesis (d) fossilization
 66. Which of the following attributes is an essential component of scientific temper? (a) open mindedness (b) hypothesis (c) subjectivity (d) rigidity
 67. The method of scientific inquiry that describes natural structures and processes as accurately as possible through careful observation and the analysis of data is known as (a) hypothesis based science (b) experimental science (c) discovery science (d) qualitative science
 68. Collecting data based on observation is an example of ____ analyzing this data to reach a conclusion is an example of ____ reasoning (a) hypothesis based sciences, inductive (b) discovery science, inductive (c) the process of science; deductive (d) descriptive science; deductive
 69. When applying the process of science, which of these is tested? (a) a question (b) an observation (c) hypothesis (d) a production
 70. The application of scientific knowledge for some specific purpose is known as ____ (a) technology (b) deductive science (c) inductive science (d) pure science.

Paper 2 of 11 — GSE 112 2016/2017 USE OF LIBRARY

Level 100 • First Semester • PastQuestion

| UNIVERSITY OF PETROLEUM RESOURCES EFFUR

USE OF LIBRARY (GS 112)

FIRST SEMESTER EXAMINATION 2016/2017 SESSION tim

NAME OF STUDENT: ' payee

DEPT: MATRIC NO: hte

INSTRUCTION: ANSWER ALL, ANY CANCELLATION INVALIDATES THAT NUMBER

TENG: Pe neral | fjedce ir

te So aw is an information material that gives general KNOWieve™

a given discipline.

2. Taking the work or an idea of someone else and pass it off as one's own is

3. The book backbone is also referred to Spat

4. The library's objective is to encourage and promote Liang ay

Tenth and Reseryech i

Sy pee ee Bernes is a unit of the library that registers and attends to user's information needs.

6. _Dihenenss and _Yerv kerk are examples of reference sources.

7. Astandard textbook is made up of "4 pages.

8. What is the full meaning of ISBN Ned eee) Cndovd Covad ex

9. Eet~4 and dae deony are prohibited in the library.

10.A sandan textbook is made up of four parts which include Qed iis

Prelinmanery (bye ; Tank and bate Prges

11. The University Librarian is usually a a University.

12. Some of the services provided in the library include Tothericnl anda 2

3. A library attached to a higher institution of learning is Aendennr Lbere-ry

4. is a library material that is accessible only with the use of 4 computer.

5. The term 'Library' is derived from a Latin word known as

6. What is the full meaning of OPAC_Qlme Ain ferns Cobnbogue

7. _ Speed Lorene is a library that is attached to private organizations, companies, hospitals and research institute.

;, Ruoerwgly ; is a book that gives account of a person's life.

2 a se

L9, Aa Arerre! library offers services to the general public irrespective of sex, age, status and educational background.

20. Library catalogue provides _ CLeasiPiantron to the library holding.

21. Books on the shelves can be traced through the number.
22. Pre Pemes Souris materials are not meant to be read cover to cover.
23. Journals, magazines and conference proceedings are examples of _ Peont Sovrtes
24. Doehereny is a collection of the terms of a subject or discipline including their meaning and use that are alphabetically arranged.
25. (at lequ—q is the art of describing a book or a non-book material in bibliographical terms on a catalogue card.
26. Two notable classification schemes used across the world are Lowry Y Crys | Le) and Newey Beciml Clg Freon (bre)
27. Encyclopaedia Americana is an example of :
28. Registration of library users is done in Cy udnw when section of the library.
29. Charging and discharging of library materials is done in Cw horn section of the library.
30. Books of high demands are kept in section of the library.
31. Describe our text bibliographically; give at least seven bibliographic details.

Paper 3 of 11 — GSE112 USE OF LIBRARY QUESTIONS AND ANSWER

Level 100 • First Semester • PastQuestion

GSE 112 USE OF LIBRARY QUESTIONS AND ANSWER.

1. Write the full meaning of ISBN_____. Ans; INTERNATIONAL STANDARD BOOK NUMBER (ISBN).
2. Write the full meaning of OPAC_____. Ans; ONLINE PUBLIC ACCESS CATALOGUE. (OPAC).
3. What is Special Library_____? Ans; SPECIAL LIBRARY IS A LIBRARY THAT IS ATTACHED TO PRIVATE ORGANISATION, HOSPITALS AND RESEARCH INSTITUTIONS.
4. The services provided by the library include _____ and _____ services ? Ans; TECHNICAL AND CIRCULATION SERVICES.
5. Registration of library users is done in _____ section of the library? Ans; CIRCULATION.
6. The library attached to a higher institution of learning is _____? Ans; ACADEMIC LIBRARY.
7. _____ and _____ are prohibited in the library? Ans; NOISE MAKING and EATING.
8. _____ is a collection of the terms of a subject or discipline their meaning and use that are alphabetically arranged? Ans; DICTIONARY
9. _____ library offers services to the general public irrespective of status or educational background? Ans; PUBLIC LIBRARY.
10. _____ materials are not meant to be read from to cover? Ans; REFERENCE.
11. Library catalogue provides_____ to the library holdings
12. Books in the shelves can be found through _____ number? Ans; LIBRARY CALL.
13. The backbone is also referred to as the _____? Ans; SPINE.
14. Magazines and conference proceedings are examples of_____? Ans; INFORMATION SOURCES AND RESOURCES.
15. The library's objective Is to encourage and promote _____, _____ and _____? Ans; TEACHING, LEARNING and RESEARCH.
16. _____ is a unit of the library that registers and attends to users information needs? Ans; CIRCULATION UNIT.
17. _____ and _____ are examples of reference materials? Ans; DICTIONARY and ENCYCLOPAEDIA
18. Encyclopaedia Britannica is an example of _____? Ans; GENERAL ENCYCLOPAEDIA.
19. A standard textbook is made up of _____? Ans; ACADEMIC LIBRARY
20. Fupre library is an example of _____ library? Ans; ACADEMIC LIBRARY.

21. _____ are publications that appear regularly or irregular intervals and are meant to be continued indefinitely? Ans; PERIODICALS.
22. Taking the work or idea of someone and pass it off as one's own is? Ans;
23. _____ is the process of obtaining library books for home use? Ans; CHARGING/CHARGENG.
24. The term library is derived from a Latin word known as _____? Ans; LIBER.
25. What is the full meaning of ISSN? Ans; INTERNATIONAL STANDARD SERIAL NUMMBER (ISSN).
26. Give an example of journal in your discipline? Ans; JOURNAL OF OIL AND GAS EXPLOITATION.*****
27. Information literacy is the ability to find _____ analyse and use _____? Ans;
28. Encyclopaedias, Dictionaries and Yearbooks are examples of _____? Ans; REFERENCE MATERIALS
29. What is your definition of a library? Ans;
30. A standard book is made of four parts which include? BENDING,PRELIMINARY PAGES,TEXT, and AUXILIARY PAGES.
31. A national library uses UBN and USN
32. What are the three main approach to library catalogue? Ans; BOOK CATALOGUE,CARD CATALOGUE ONLINE PUBLIC ACCESS CATALOGUE
- God bless us all.

Paper 5 of 11 — GST 112 The Evolution Of Nigeria as a political unit Set 2024 2025 Second Semester

Level 100 • Second Semester • Handout

The evolution of Nigeria as a political unit is a complex and fascinating story, marked by colonial imposition, the rise of nationalist consciousness, and a determined struggle for self-governance.

1. The 1914 Amalgamation: The Genesis of a "Nation"

Before 1914, the territory now known as Nigeria consisted of diverse independent ethnic groups and kingdoms. British influence grew throughout the 19th century, driven by economic interests (palm oil, raw materials) and the desire to control trade routes. This led to the establishment of several British colonial entities:

- Lagos Colony (1861): Initially a trading post, it was annexed by Britain to control the lucrative trade in the Bight of Benin.
- Oil Rivers Protectorate (1884), later Niger Coast Protectorate: Established to regulate trade and suppress slavery in the Niger Delta.
- Northern Nigeria Protectorate (1900): Formed from the territories previously under the Royal Niger Company's shadowy control.
- Southern Nigeria Protectorate (1906): Resulting from the merger of the Lagos Colony and the Niger Coast Protectorate.

The pivotal moment in Nigeria's formation was the 1914 amalgamation, orchestrated by Sir Frederick Lugard, the then Governor-General. This administrative fiat merged the Northern and Southern Protectorates into the Colony and Protectorate of Nigeria.

Reasons for Amalgamation:

- Administrative convenience and efficiency: Running two separate colonies was seen as costly and inefficient. The North was financially dependent on grants from the British Treasury, while the South was more prosperous due to customs duties from its coastal trade. Amalgamation aimed to make the colony self-sustaining by using the South's revenue to subsidize the North.
- Economic reasons: To facilitate the exploitation of resources across the entire territory and streamline trade.
- Strategic interests: To consolidate British control over a vast and resource-rich region.

Impact of Amalgamation:

While the amalgamation created a single political entity, it largely ignored the deep cultural, religious, and socio-political differences between the diverse groups.

- Deepened regional and ethnic divisions: The amalgamation, rather than fostering unity, inadvertently deepened pre-existing regional and ethnic disparities. The North, largely Muslim and with centralized emirate systems, was governed largely through indirect rule, preserving traditional structures. The South, with more decentralized societies and greater exposure to Western education and Christianity, experienced different colonial policies. This uneven application of policies sowed seeds of future tensions and political fragmentation.

- Centralized governance under British interests: The new centralized colonial structure prioritized British interests over those of the indigenous populations.

- Lack of national identity: The forced union did little to foster a sense of national unity, leading to persistent challenges of cohesion in post-colonial Nigeria.

- Laying groundwork for ethnic-based competition: The colonial framework, particularly through indirect rule, inadvertently set the stage for ethnic-based competition for power among regional elites.

2. Formation of Political Parties: Early

Stirrings of Nationalism

The introduction of the "elective principle" by the Clifford Constitution of 1922 marked a significant step in Nigeria's political evolution, allowing for limited African representation in the Legislative Council (though primarily for Lagos and Calabar). This stimulated the formation of early political associations.

- Nigerian National Democratic Party (NNDP) - 1923: Founded by Herbert Macaulay, often considered the "father of Nigerian nationalism." The NNDP was the first political party in Nigeria and largely confined its activities to Lagos, where it won all the elective seats in the Legislative Council for a period. Its objectives included promoting higher education, fair trade, and Africanization of the civil service.

- Nigerian Youth Movement (NYM) - 1935: Initially known as the Lagos Youth Movement, it aimed for complete autonomy for Nigeria and broadened the scope of nationalist agitation beyond Lagos. Key figures included Ernest Ikoli and Samuel Akinsanya. The NYM challenged the NNDP's dominance in the Lagos elections of 1938.

These early parties, though limited in scope and often focused on urban areas, began to articulate demands for greater African participation in governance and laid the groundwork for a broader nationalist movement.

3. Nationalist Movement and the Struggle for Independence

The nationalist movement gained significant momentum after World War II, fueled by returning soldiers who had fought for Allied powers, increasing political awareness, and the global wave of decolonization.

Key Figures and Organizations:

- Herbert Macaulay: As mentioned, he was a foundational figure, using his influence and the Lagos Daily News to promote nationalist ideas. He co-founded the National Council of Nigeria and the Cameroons (NCNC).
- Dr. Nnamdi Azikiwe ("Zik"): A charismatic leader and journalist, Azikiwe founded the West African Pilot newspaper, which became a powerful voice for independence. He co-founded the National Council of Nigeria and the Cameroons (NCNC) in 1944 (taking over leadership after Macaulay's death in 1946). The NCNC was initially broad-based and aimed to unite Nigerians across regions to demand self-rule.
- Chief Obafemi Awolowo: A prominent lawyer and politician from the Western Region. He founded the Action Group (AG) in 1951, which emerged from the Yoruba cultural organization, Egbe Omo Oduduwa. The AG focused on developing the Western Region, notably introducing free primary education, and advocated for self-governance.
- Sir Ahmadu Bello: A leading figure from the Northern Region and a descendant of Usman Dan Fodio. He led the Northern People's Congress (NPC), formed in 1949 from the cultural association Jam'iyyar Mutanen Arewa. The NPC's primary focus was on protecting Northern interests and modernizing the region, though they initially expressed caution about immediate independence, fearing Southern domination.
- Sir Abubakar Tafawa Balewa: Deputy Leader of the NPC, he became Nigeria's first Prime Minister at independence.
- Anthony Enahoro: Notable for being the first to move a motion for Nigeria's independence in the Federal House of Representatives in 1953, though it was not immediately passed.

Key Milestones in the Struggle:

- Richard's Constitution (1946): This constitution, while

maintaining colonial control, introduced regionalism, dividing Nigeria into three regions: Northern, Western, and Eastern. This inadvertently fostered the growth of regionally-based political parties (NPC, AG, NCNC) and intensified regional rivalries, which would have long-lasting effects.

□ Macpherson Constitution (1951): This constitution significantly increased Nigerian participation in the legislative and executive councils at both central and regional levels. It established a House of Representatives and regional Houses of Assembly with elected majorities. This further empowered the regional parties and fueled the demand for greater autonomy.

□ London and Lagos Constitutional Conferences (1953, 1954, 1957, 1958): These conferences brought together Nigerian leaders and British officials to discuss the future of Nigeria. Key issues debated included the pace of independence, the federal structure, revenue allocation, and minority rights. The 1954 Constitution, a result of these conferences, established a federal system with a greater degree of regional autonomy and separated Lagos from the Western Region.

□ Self-Government for Regions (1957): The Eastern and Western Regions achieved self-government in 1957. The Northern Region followed in 1959.

□ Motion for Independence: While Anthony Enahoro's motion for independence in 1953 was met with opposition from Northern representatives who felt they were not ready, the sustained pressure from nationalist leaders and parties ultimately led to the British government's commitment to grant independence. Sir Abubakar Tafawa Balewa moved a successful motion for independence in 1959.

Achieving Independence:

After years of negotiations and increasing pressure from the nationalist movement, Nigeria gained independence on October 1, 1960. Sir Abubakar Tafawa Balewa became the first Prime Minister, and Dr. Nnamdi Azikiwe became the ceremonial Governor-General (later the first President when Nigeria became a republic in 1963).

The journey from the 1914 amalgamation to independence in 1960 was a transformative period for Nigeria, laying the foundation for a new sovereign nation, albeit one grappling with the legacies of its colonial creation, particularly the complexities of its diverse ethnic groups and regional identities.

Paper 6 of 11 — GST 112 on Trade 2024 2025 Set Second Semester

Level 100 • Second Semester • Handout

Concept of trade and economics of self-reliance (indigenous trade and market system, indigenous apprenticeship system among Nigeria people, trade, skill acquisition and self-reliance).

Trade and Self-Reliance

Imagine living in a village where one person grows yams, another catches fish, and someone else makes clothes. When the yam farmer wants fish or the fisherman needs clothes, they simply swap what they have. This process is what we call trade. Trade means the exchange of goods and services to satisfy needs, it can also be defined as transfer of goods and service from one person or entity to another, often in exchange for something or money. In the past, this was done through barter, a direct exchange of items. Today, trade mostly involves the use of money. Trade can take place locally (within a town or country), such as a farmer selling yams in a nearby market, or internationally, like when Nigeria exports crude oil to other countries in exchange for foreign goods or currency.

Types of Trade:

1. Barter Trade:- Trading goods for goods (used in traditional societies).
2. Monetary Trade:- Trading goods and services using money as a medium of exchange (modern systems).

Trade has always been important in human societies. It helps people get what they do not produce themselves and allows communities to specialize in what they do best.

SELF-RELIANCE.

Have you heard the saying, “Cut your coat according to your cloth” ? That captures the idea of self-reliance, using what you have to solve your own problems instead of always depending on others. Self-reliance means being able to care for yourself or your community by applying your own skills, knowledge, and resources. For instance a graduate who starts a tailoring business instead of waiting for a government job is self-reliant and a village that builds a bridge through communal effort instead of waiting for government assistance is also self-reliant. Self-Reliance is the ability of individuals or communities to depend on their own skills and resources to meet their needs without depending heavily on others or a quality of depending on yourself for things instead of relying on others. Simply say producing what you consume. In a country like Nigeria, where unemployment and poverty are major challenges, embracing trade and self-

reliance is essential. By learning practical skills, starting small businesses, and exchanging goods and services, people and communities can overcome hardship without relying solely on external support.

1 | Page

Economics of self-reliance is the study or practice of how individuals, communities, or nations can use their own skills, knowledge, labor, natural resources, and local technologies to create jobs, provide goods and services, meet daily needs, grow economically without depending too much on external help.

Indigenous Trade and Market Systems in Nigeria

The word “indigenous” means something that comes from a particular place or culture, something native, traditional, or locally developed. In this context, it refers to systems and practices that belong to Nigeria’s own cultures and traditions, not introduced by foreigners or Western influence. Indigenous trade encompassed diverse practices among various cultural groups involving the exchange of goods, resources and knowledge. These systems were often complex and reflected the unique needs and environments of the participating communities

The pre-colonial Nigerians economy had a well-organized traditional trade systems that included agriculture, local industry and trade that is patterns by the influence of ecology and culture. These are known as indigenous trade and market systems. Literally Indigenous trade refers to the way people in Nigerian communities exchanged goods and services before colonial rule. These systems were based on trust, community values, and strong social relationships.

Key Features of Indigenous Trade:

- Goods were exchanged without money, using the barter system.
- Trading happened in designated markets on specific days.
- Items commonly traded included farm produce, local crafts, salt, clothing, palm oil, and livestock.
- Trade was solely for practical purpose and also involved the exchange of ceremonial object

These systems helped meet people's needs while strengthening the social and cultural fabric of Nigerian communities.

What is a Market in Indigenous Nigeria?

2 | Page

A market is a place where people gather to exchange goods and services. In traditional Nigerian societies, markets served not only as commercial centers but also as important social and cultural spaces where relationships

were built and community life thrived. These markets are vital economic hubs deeply intertwined with the nation's history and diverse communities.

Types of Traditional Nigerian Markets

1. **Periodic Markets** These markets operate on specific days, often every four or eight days, depending on local customs. Example: In Igbo land, markets are held on traditional days such as Eke, Orie, Afor, and Nkwo.
2. **Daily Markets** Found in larger towns or urban areas, these markets are open every day, providing a constant place for buying and selling.
3. **Specialty Markets** These are markets that focus on particular goods such as livestock, herbal medicine, fabrics, or handcrafted items. They attract traders and buyers with specific needs or interests.

Examples of Famous Indigenous Markets

Region	Market Name	Known For
South-East	Nkwo Nnewi	Auto parts and electronics
South-West	Oja Oba (Ibadan)	Clothing, food items
North	Kano Kurmi Market	Leather goods, grains, textiles
South-South	Wuse Market (Abuja)	General consumer goods

Source: Compiled from general knowledge of major Nigerian markets and regional trade practices.

Roles of Women in Indigenous Markets

Women have been central to indigenous trade in Nigeria, often serving as the backbone of local economies. Their influence goes beyond just buying and selling, they also help organize, lead, and passed down trade skills to the next generation, making them key drivers of both commerce and community development.

3 | Page

□ In Yoruba communities, women hold significant authority in the marketplace. The *Iyálọjà*, meaning “Mother of the Market,” is a respected female leader who oversees market operations, resolves disputes, and represents traders in community matters.

□ In Igbo society, women dominate much of the retail trade, especially in food items, cloth, and household goods. In many towns, women are elected as market leaders or “market queens,” a title that recognizes their leadership and business skills.

□ Trading was not just a job, it was a heritage. Women often taught their daughters or apprentices how to trade, manage money, and

build customer relationships. This passing down of skills was a form of economic inheritance, ensuring family survival and wealth transfer across generations.

Forms of Indigenous Trade

□ Barter System this is when people exchange goods without using money. Example: Giving 1 tuber of yam in return for 5 kola nuts.

□ Silent Trade this is a quiet form of trade where traders don't talk or meet directly.

One person leaves their goods and walks away, and the other person leaves their own goods or payment in return. Used when people didn't speak the same language.

□ Itinerant Trade some traders moved from one village to another to sell their goods.

This helped share products across different areas and allowed people from far places to trade.

Importance of Indigenous Trade and Market Systems

1. Economic survival: before the modern economy, trade was how people got what they needed.
2. Social connection: markets brought people together and strengthened community bonds.
3. Cultural expression: markets were venues for music, festivals, and traditional practices.
4. Regional cooperation: trade linked communities and promoted peaceful co-existence.
5. Foundation for modern trade: today's business culture in Nigeria has its roots in these systems.

Apprenticeship

4 | Page

Apprenticeship is a system where a young or inexperienced person (called an apprentice) learns a skill or trade by working under the guidance of a more experienced person (called a master or trainer). Apprenticeship is simply "learning by doing." This training often takes place over several months or years and involves hands-on experience. Instead of just reading books or sitting in a classroom, the apprentice learns by doing, watching the master work, practicing the skills, and gradually becoming capable of doing the job independently. This system is common in areas like tailoring, carpentry, mechanics, hairdressing, blacksmithing, and many other trades in Nigeria.

In summary, Apprenticeship is a practical way of learning a trade by working under a skilled person. It allows people to gain hands-on

experience and become self-reliant through “learning by doing.”

Indigenous Apprenticeship Systems in Nigeria

Now that we understand what “indigenous” and “apprenticeship” mean, let’s combine the two ideas. Indigenous apprenticeship in Nigeria is a hands-on, traditional system where young people learn trades from experienced community members. It helps pass down valuable skills, moral values, and prepares individuals to become self-reliant and successful in their own businesses.

Steps in the Indigenous Apprenticeship System

- Agreement- a young person is placed under a master craftsman or trader (like a tailor, mechanic, carpenter, or businessperson). This is usually arranged by the apprentice’s parents or guardians.
- Training Period- The apprentice works closely with the master for 2 to 7 years, learning the trade by watching, helping, and practicing. The apprentice may even live with the master during this period.
- Moral and Discipline Training - Apart from job skills, the apprentice also learns discipline, respect, time management, and how to relate with customers — all important for future success.
- Settlement or Graduation At the end of the training, the master may give the apprentice some tools, money, or even help set up a small business. This process is often called “settlement,” especially among the Igbo people.

Examples of Indigenous Apprenticeship Systems in Nigeria

Ethnic Apprenticeship Unique Features

Group Style

5 | Page

Igbo Igba Boy system Focused on learning business/trading. Master settles apprentice after years of service.

Yoruba Artisan-focused Training in trades like hairdressing, tailoring, and carpentry. Apprentices often live with their masters

Hausa/Fulani Skills like Apprentices often combine skill leatherwork, learning with Islamic education farming, (Almajiri system). blacksmithing

Source: Okafor E.E (2022); Olutayo, A.O. (1999).

Importance of Indigenous Apprenticeship in Nigeria

- Skill Transfer: Passes practical skills from one generation to the next.

- Job Creation: Trained apprentices can become self-employed or employ others.
- Reduces Unemployment: Especially in a country where formal jobs are scarce.
- Builds Entrepreneurship: Especially in Igbo culture where boys are trained to start and run successful businesses from a young age.
- Social Development: Teaches values like hard work, loyalty, respect, and community support.

Challenges Facing Indigenous Apprenticeship System in Nigeria

Today

- Decline in interest among youth due to materialism and the allure of quick riches
- Lack of structured training programs leading to standardized skill acquisition
- Lack of formal recognition or certification.
- Poor funding/support for young entrepreneurs.
- Exploitation of apprentices (e.g., overwork without settlement).

Role of Trade and Skill Acquisition in Self-Reliance

In a country like Nigeria, where unemployment and poverty are common, learning how to depend on your own skills and efforts is one of the most powerful tools for survival and success. Two key things that help with this are: Trade (buying and selling goods or services), and Skill Acquisition (learning a practical ability that helps you earn a living or solve

6 | Page

a real-life problem, like tailoring, carpentry, coding, or farming). Together, trade and skill acquisition play a major role in achieving self-reliance both for individuals and the entire society.

Here's the Difference:

Term	Meaning	Key Focus
Indigenous Apprenticeship System	A traditional and community-based way of learning a trade or craft under a skilled master, passed down over generations	Emphasizes local customs, cultural values, and informal learning
Skill Acquisition	A broader term that means learning any skill, process of gaining whether through traditional, formal, or informal means (including	Focuses on the process of gaining skills, not limited to tradition or culture.

schools, workshops, or online).

Source: Compiled from educational knowledge on traditional apprenticeship and vocational training practices in Nigeria.

In Summary, all indigenous apprenticeship involves skill acquisition, but not all skill acquisition happens through indigenous apprenticeship. So, you can say indigenous apprenticeship is one form of skill acquisition, especially common in traditional African societies.

How Trade and Skills Lead to Self-Reliance

Trade and skills go hand in hand to build confidence, income, and independence. A self-reliant society is one where people use their own hands and minds to solve problems and create better lives and one of the best ways to achieve self-reliance is through trade and skill acquisition. Here's how they work together:

□ Skills Provide the Means to Produce when someone learns a skill like tailoring, carpentry, farming, shoemaking, or hairstyling, they can create something useful or offer a valuable service. This means they don't have to wait for a government job or foreign help. Example: A

7 | Page

young woman who learns how to bake can start selling cakes in her community.

□ Trade Helps People Earn and Exchange Once a person has a skill, they can trade what they produce for money or for other things they need. This can happen in local markets, online, or even across borders. Example: A local carpenter can sell furniture in the village market or supply to bigger towns.

□ Economic Independence With skills and trade, individuals become economically independent. They can feed their families, pay school fees, and even employ others lifting not just themselves, but their whole community. Example: Many Nigerian families rely on small businesses or informal trade for daily survival not government jobs.

□ Reduces Poverty and Unemployment When more people learn skills and go into trade, it reduces the number of people depending on handouts. It encourages productivity, entrepreneurship, and innovation.

Turn Skills into Power: The Road to Self-Reliance

□ Your skills are your tools.

□ Your trading mindset is your engine.

□ Self-reliance is your power.

□ The more people produce and trade, the stronger our economy becomes.

□ A self-reliant community is a stronger Nigeria.

You don't have to wait to "make it" after graduation you can start building now.

This topic is not just theory, it's about real life. It's about how you, as a student or young Nigerian, can survive, thrive, and build a future using your hands, your brain, and a little creativity.

Paper 7 of 11 — GST 112 Note 2024 2025 Set Second Semester

Level 100 • Second Semester • Handout

RE-ORIENTATION, MORAL VALUES, AND NATIONAL VALUES

Re-orientation, moral values, and national values are key pillars for building a better Nigeria. The country cannot progress without citizens who Understand what is right and wrong (moral values), Feel united and loyal to the nation (national values), And are willing to change for the better (re-orientation). These efforts require government support, education reform, religious institutions, families, and individual responsibility. Example To fight corruption in Nigeria Educate citizens through media and school campaigns. Teach integrity and honesty. Encourage patriotism and selfless service.

RE-ORIENTATION

Re-orientation refers to a change in a person's or society's mindset, behavior, and attitude towards a new and more desirable direction. It involves shifting from negative or harmful values and beliefs to positive, progressive, and socially beneficial ones. Nigeria has struggled with issues like corruption, indiscipline, tribalism, and lack of patriotism. Re-orientation efforts aim to correct these problems by instilling new national values.

Why Nigeria Needs Re-orientation

Nigeria has faced challenges like Corruption in public and private sectors, Ethnic and religious discrimination, Lack of patriotism and Social indiscipline (e.g., bribery, traffic law violations, exam malpractice) These problems have contributed to underdevelopment, poor international image, and public mistrust in governance.

Goals of Re-orientation

The goal is to create a more responsible, patriotic, honest, and disciplined citizenry.

- i. Promote civic responsibility
- ii. Encourage national unity
- iii. Reduce corruption and social vices
- iv. Build a value-driven society

MORAL VALUES

Moral values are principles of right and wrong behavior accepted by individuals or society. They guide personal conduct and interactions with others. Moral values are deeply influenced by culture, religion, and tradition. However, in recent years, many Nigerians express concern about moral decay—especially among the youth. Examples A Nigerian airport

cleaner returning lost money or valuables instead of stealing them. This happened in 2019 when a cleaner at Murtala Muhammed Airport returned a lost bag containing large sums of money. The story of Late Dora Akunyili, former NAFDAC Director-General, who resisted bribes and fought against counterfeit drugs.

Source of Moral Values in Nigeria

- i. Religion (Christianity, Islam, Traditional beliefs)
- ii. Family upbringing
- iii. Cultural practices
- iv. Education

Importance

A morally upright society:

- i. Reduces crime and corruption
- ii. Promotes trust and cooperation
- iii. Builds respectful and responsible citizens

NATIONAL VALUES

National values are shared beliefs and practices that promote unity, identity, and development of a nation. They define what a country collectively stands for. National values promote patriotism, loyalty, justice, and national development. They also help overcome tribalism and ethnic division.

CORE NATIONAL VALUES IN NIGERIA

Patriotism: Citizens participating in national events like Independence Day celebrations, singing the national anthem with pride.

Dignity of Labour: Nollywood actors who started from humble beginnings and rose through hard work—e.g., Mercy Johnson or Ali Nuhu.

Religious Tolerance: Interfaith marriages or festivals where Christians and Muslims celebrate together peacefully, especially in places like Lagos.

Discipline: Governor Babatunde Fashola's administration in Lagos is remembered for improving public discipline through environmental sanitation and traffic laws.

Social Justice: Advocacy for equal rights for women and minority groups, like the push for gender equality and the #EndSARS movement which demanded fairness in policing.

Importance of National Values

- i. Encourage national identity and pride
- ii. Strengthen unity in diversity
- iii. Guide public institutions and governance

iv. Inspire citizens to contribute positively to national growth

THE 3 R'S: RECONSTRUCTION, REHABILITATION, AND RECONCILIATION

These three concepts were major post-war policies introduced by the Nigerian government after the Nigerian Civil War (1967–1970) to restore peace and unity in the country. The war lasted from 1967 to 1970. Fought between the Federal Government of Nigeria and the secessionist state of Biafra (mainly Igbo people from the Eastern Region). The war caused massive loss of lives, displacement, economic collapse, and infrastructure destruction, especially in the East.

RECONSTRUCTION

Reconstruction refers to rebuilding the damaged physical and economic infrastructure of Nigeria, especially in war-affected areas. Examples Road and bridge repair: The Federal Government invested in rebuilding Onitsha Bridge, roads in Enugu, and other war-torn areas. Revival of Eastern Industries such as Nigercem in Nkalagu, Golden Guinea Breweries, and Premier Breweries received attention. Efforts were made to reconnect the Eastern oil-producing states (e.g., Rivers, Imo) into Nigeria's national economy.

Goals

- i. Rebuild roads, schools, hospitals, and houses destroyed during the war.
- ii. Revive the economy in the Eastern Region.
- iii. Reintegrate the region into national development plans.

REHABILITATION

Rehabilitation involves providing support to displaced persons and war victims, helping them return to normal life. Examples Displaced people were resettled with government support in areas like Abakaliki, Awka, and Port Harcourt. Biafran soldiers and civilians were granted amnesty and allowed to return to civilian life. Government created agencies like the Nigerian Red Cross and Rehabilitation Commission to distribute aid. School re-enrollment campaigns for children affected by war trauma and displacement.

Goals

- i. Offer humanitarian aid: food, shelter, and medicine.
- ii. Help ex-soldiers and Biafran civilians reintegrate into society.
- iii. Reopen schools and restore basic services.

Reconciliation

Reconciliation means healing the emotional and political divisions between

Nigerians—especially between the East and the rest of the country. Examples “No Victor, No Vanquished” Policy (1970): Announced by General Yakubu Gowon to emphasize peace and unity over revenge. Many top Biafran officials were not punished; some like Emeka Ojukwu were eventually pardoned and later ran for president. Easterners were reabsorbed into national institutions, although there were complaints of marginalization.

Goals

- Promote national unity and trust.
- Prevent future civil unrest.
- Forgive past grievances and ensure inclusion.

AUSTERITY MEASURES

Austerity measures are government policies used to reduce national debt or control inflation by cutting public spending and increasing taxes. Austerity measures, while aimed at stabilizing the economy, often result in social hardship if not properly implemented.

Purpose

- i. Address economic crisis or recession.
- ii. Stabilize currency and control inflation.
- iii. Reduce government deficits.

Austerity Measures in Nigeria

Nigeria has implemented austerity measures during several key economic crises:

The Shagari Era (1979–1983)

Oil boom of the 1970s was followed by a crash in the early 1980s. Nigeria faced recession, high inflation, and foreign debt.

Austerity Measures Introduced

- i. Import Restrictions: Ban on luxury goods to save foreign exchange.
- ii. Rationing: Limited imports of rice, milk, and sugar.
- iii. Massive Layoffs: Downsizing of government staff.
- iv. School Feeding & Subsidies Cut: Withdrawal of public programs.
- v. Salary Freeze: No increase in workers' wages.

Impact:

- i. Economic hardship for average Nigerians.
- ii. Black markets emerged.
- iii. Public dissatisfaction contributed to the military coup in 1983.

STRUCTURAL ADJUSTMENT PROGRAMME (SAP) – 1986 (BABANGIDA ERA)

Nigeria's debt burden and inflation were worsening. SAP was introduced under IMF/World Bank advice.

Measures Introduced

- i. Devaluation of the Naira
- ii. Removal of fuel and food subsidies
- iii. Privatization of public enterprises
- iv. Introduction of new taxes

Effects

- i. Prices of goods soared.
- ii. Unemployment increased.
- iii. Widespread poverty.
- iv. Birth of widespread protests and discontent.

Recent Austerity Measures

Reasons

- Decline in oil prices
- COVID-19 economic downturn
- Huge national debt

Government Actions

- Fuel subsidy removal (leading to increased transport and food costs)
- Borrowing and increased taxation
- Restriction on foreign exchange

Effects:

- Economic hardship on low-income families
- Rise in inflation and food prices
- National debates over whether to continue subsidy or provide alternatives

WAR AGAINST INDISCIPLINE AND CORRUPTION (WAIC), MASS MOBILIZATION FOR SELF-RELIANCE, SOCIAL JUSTICE AND ECONOMY RECOVERY (MAMSER), NATIONAL ORIENTATION AGENCY (NOA)

Three major government-driven campaigns and agencies in Nigeria aimed at fostering patriotism, discipline, economic recovery, and national unity War Against Indiscipline and Corruption (WAIC) Mass Mobilization for Self-Reliance, Social Justice and Economic Recovery (MAMSER) National Orientation Agency (NOA) These programs were launched at different times in Nigeria's history, each with specific goals but with a common objective: to reshape Nigerian citizens' attitudes and values for national development.

WAR AGAINST INDISCIPLINE AND CORRUPTION (WAIC)

Launched in 1984 by General Muhammadu Buhari's military government. It

aimed to instill discipline in public behavior—e.g., orderly queuing and time consciousness. To correct widespread indiscipline, corruption, laziness, dishonesty, and lack of civic responsibility among Nigerians.

Objectives of WAIC

1. Promote public morality and national discipline.
2. Eliminate corruption in public offices.
3. Encourage respect for law and order.
4. Cultivate the habit of cleanliness and environmental hygiene.
5. Restore Nigeria's international image and national pride.

Successes of WAIC

- i. Improved public order and discipline (e.g., queuing culture, early work attendance).
- ii. Reduction in open corruption (for a time).
- iii. Cleaner cities through monthly environmental sanitation.

Criticisms of WAIC

- i. Military-style enforcement: People were beaten or publicly humiliated.
- ii. Short-lived: The program died after the Buhari government was overthrown in 1985.
- iii. Focused more on symptoms than root causes of corruption.

MASS MOBILIZATION FOR SELF-RELIANCE, SOCIAL JUSTICE, AND ECONOMIC RECOVERY (MAMSER)

Launched in 1987 by General Ibrahim Babangida's military regime, Led by Professor Jerry Gana. MAMSER was part of the political transition to civilian rule and the Structural Adjustment Programme (SAP) to revive the economy.

Objectives of MAMSER:

1. Mobilize Nigerians for self-reliance and reduce dependence on imports.
2. Promote social justice and equity in governance.
3. Educate Nigerians on civic rights and responsibilities.
4. Re-orient citizens to support economic recovery and productivity.
5. Encourage participation in the democratic transition.

Successes of MAMSER

- i. Helped prepare Nigerians for a democratic transition (though short-lived after the annulled 1993 election).
- ii. Promoted economic self-reliance and entrepreneurship.
- iii. Taught political and civic responsibility to rural and urban citizens.

Criticisms of MAMSER

- i. Operated under a military regime, limiting public trust.
- ii. Its impact was weakened after Babangida's failed transition program.
- iii. Many of its ideals were later absorbed into NOA.

NATIONAL ORIENTATION AGENCY (NOA)

Established in 1993 by Decree No. 100 (now an Act of Parliament). It absorbed MAMSER and continued many of its responsibilities. Current Mandate are Promote national unity, patriotism, civic responsibility, and positive behavioral change. Examples Partnered with EFCC to educate youth on the dangers of fraud (Yahoo Yahoo). Played a key role in the COVID-19 awareness campaign in rural areas. Encouraged peaceful elections through community peacebuilding workshops.

Objectives of NOA

- i. Communicate government policies to the public.
- ii. Promote national values and cultural heritage.
- iii. Mobilize support for national development programs.
- iv. Encourage peaceful coexistence and religious tolerance.
- v. Monitor public opinion on government activities.

NOA's Tools for Mass Mobilization

- i. Town hall meetings and village square engagements.
- ii. Radio and television programs in English and local languages.
- iii. Drama, jingles, and posters to reach rural populations.
- iv. Schools and NYSC orientation programs.

Challenges Facing NOA

- i. Low funding and logistics problems.
- ii. Public apathy and distrust of government messages.
- iii. Limited digital reach in the age of social media.

Level 100 • Second Semester • Handout

1. Nigerian history, culture, and art up to 1800 (Yoruba, Hausa and Igbo peoples and culture; peoples and culture of the ethnic minority groups).
2. Nigeria under colonial rule (advent of colonial rule in Nigeria and colonial administration of Nigeria).
3. Evolution of Nigeria as a political unit (amalgamation of Nigeria in 1914, formation of political parties in Nigeria, nationalist movement and struggle for independence).
4. Nigeria and challenges of nation building (military intervention in Nigerian politics and Nigerian Civil War).
5. Concept of trade and economics of self-reliance (indigenous trade and market system, indigenous apprenticeship system among Nigeria people, trade, skill acquisition and self-reliance).
6. Social justices and national development (law definition and classification. judiciary and fundamental rights).
7. Individual, norms and values (basic Nigeria norms and values, patterns of citizenship acquisition, citizenship and civic responsibilities, indigenous languages, usage and development, negative attitudes and conducts, cultism, kidnapping and other related social vices).
8. Re-orientation, moral and national values (The 3R's -Reconstruction, Rehabilitation and Re-orientation; Re-orientation strategies: Operation Feed the Nation (OFN), Green Revolution, Austerity Measures, War Against Indiscipline (WAI), War against Indiscipline and Corruption (WAIC), Mass Mobilization for Self-Reliance, Social Justice and Economic Recovery (MAMSER), National Orientation Agency (NOA).
9. Current socio-political and cultural developments in Nigeria.

Paper 9 of 11 — GST 112 on Individuals Lecture Note 2024 2025 Set Second Semester

Level 100 • Second Semester • Handout

INDIVIDUALS, NORMS AND VALUES

Understanding individuals, norms, and values is key to understanding Nigerian society. While individuals act and make choices, norms tell them what behavior is expected, and values guide them on what is right or wrong. Nigeria's rich cultural heritage offers a wide variety of these norms and values, many of which help bind its diverse people together.

Individuals learn norms and values through socialization (e.g., at home, school, church/mosque). An individual who follows norms and upholds values is seen as morally upright and socially acceptable. When individuals challenge or break norms (e.g., by dressing inappropriately or being disrespectful), they may face social sanctions. Individuals also have the power to influence norms and values (e.g., through activism, innovation, or leadership).

While Norms and values matters in the society because Shared norms and values reduce conflict and promote cooperation. Cultural norms and values shape what it mean to be Igbo, Hausa, Yoruba, etc. Help people make ethical decisions in family life, work, and public service. Values like honesty and hard work are essential for national progress.

INDIVIDUALS

An individual is a single human being distinguished from a group, class, or family. In a sociological context, individuals are the smallest unit in a society. Every person in society plays a role in maintaining or challenging norms and values.

Importance in Society

- i. Individuals interact with others to form relationships and communities.
- ii. They are shaped by their environment, family, education, religion, and experiences.
- iii. In turn, individuals also shape society by influencing customs, norms, and social change.

Examples in Nigeria

Chimamanda Ngozi Adichie (Author): As an individual, she has influenced global and Nigerian perspectives on gender, culture, and post-colonial identity.

Aliko Dangote (Businessman): An individual who has contributed to Nigeria's economy and is a role model in entrepreneurship.

Fela Kuti (Musician/Activist): As an individual, he used music to fight for social justice and challenge government corruption.

Norms

Norms are the accepted rules or standards of behavior shared by a group or society. They guide how people are expected to behave in particular situations.

TYPES OF NORMS

Folkways

These are every day, informal customs or habits that people follow for politeness or convenience. Breaking them doesn't carry serious punishment but may result in mild disapproval. Examples Greeting elders properly, In Yoruba culture, young boys prostrate and girls kneel when greeting elders. Using right hand to give/receive items It is considered rude in most Nigerian cultures to use the left hand. Removing shoes before entering a house is Common in Northern Nigeria or among Muslim families as a sign of cleanliness and respect.

Mores

These are stronger norms based on moral views of right and wrong. Violating them is more serious and can lead to community rejection or shame. Examples Speaking rudely or shouting at an elder is morally unacceptable. Engaging in premarital sex or adultery are Strongly frowned upon in both Christian and Muslim communities. Stealing in the village Even before involving the police, the community may banish or disgrace a thief.

Laws

These are official rules created and enforced by the government. Breaking laws leads to legal punishment such as fines or imprisonment. Examples Bribery and corruption is Against Nigerian law (though still common), punished under anti-corruption laws (e.g., EFCC Act). Driving without a license or breaking traffic signals can lead to arrest by VIO or FRSC. Drug trafficking is a criminal offense punishable under NDLEA laws.

Taboos

Taboos are strong social prohibitions against certain actions or discussions. They are deeply rooted in culture or religion and often seen as disgusting, shameful, or spiritually dangerous. Examples Having sexual relations with a family member is a strong taboo across all Nigerian ethnic groups. In ancient times, some communities (like the Ibibio) believed twins were evil. This is now a condemned taboo. In some parts of Nigeria, eating dogs, owls, or snakes is taboo due to spiritual or cultural beliefs. Whistling at night in

some Yoruba traditions, it's believed to invite evil spirits or snakes.

Basic Nigerian Norms

1. **Greeting Elders with Respect:** It is common for young people to kneel (Yoruba) or prostrate to greet elders. This shows respect and acknowledgment of authority.
2. **Modesty in Dressing:** In many parts of Nigeria, especially in the North, dressing modestly (especially for women) is a cultural and sometimes religious norm.
3. **Respect for Authority:** Respecting leaders, chiefs, elders, and religious leaders is deeply ingrained in many Nigerian cultures.
4. **Marriage and Family Roles:** Traditional roles often expect men to be providers and women to be caregivers. Polygamy is accepted in some parts (especially under Islamic or customary law).
5. **Communal Living:** Many Nigerian communities value living and working together, especially in rural areas. People look out for one another and participate in communal activities like farming or festivals.

VALUES

Values are the deeply held beliefs about what is good, right, and important. They are more stable and abstract than norms and help determine what norms exist.

Characteristics of Values

- i. Guide long-term behavior.
- ii. Help in decision-making and moral judgments.
- iii. Often rooted in culture, religion, and history.

Basic Nigerian Values

1. **Respect for Elders:** Seen as a moral obligation across ethnic groups. Decisions often involve consultation with older people.
2. **Hard Work:** Nigerians value diligence and ambition. Phrases like “No food for lazy man” reflect this. Education is seen as a path to success.
3. **Honesty and Integrity:** Although corruption is a problem, there is still strong societal admiration for honest people. Religious and cultural teachings emphasize telling the truth and fairness.
4. **Hospitality:** Visitors are often warmly welcomed and treated with generosity, even in poor households. Offering food and drink is common when hosting guests.
5. **Religious Faith:** Religion is central to Nigerian identity—whether Islam, Christianity, or Traditional Religion. Religious values influence behavior, dress, marriage, and more.
6. **Loyalty to Family and Community:** Nigerians place a high value on

family ties and community belonging. Decisions are often made considering the impact on the family.

PATTERNS OF CITIZENSHIP ACQUISITION

Citizenship refers to the legal status of being a member of a country and enjoying the rights, duties, and privileges that come with it. In Nigeria, citizenship is governed by the 1999 Constitution (as amended), and there are three main ways to acquire it:

A. Citizenship by Birth

A person becomes a Nigerian citizen automatically at birth if They are born in Nigeria and at least one parent or grandparent is a Nigerian citizen. They are born outside Nigeria but one or both parents are Nigerian citizens. Example Tolu, born in Lagos to Yoruba parents, is a citizen by birth. Fatima, born in the UK to Nigerian parents from Kano, is also a Nigerian citizen by birth.

B. Citizenship by Registration

This applies to people who are not citizens by birth but have strong ties to Nigeria. Mostly for Women married to Nigerian men People of African descent who want to become Nigerian citizens. Conditions are Must apply to the Nigerian government and Must take an oath of allegiance Example Linda, a Ghanaian woman, marries a Nigerian man and applies for Nigerian citizenship through registration. James, an African-American who traces his roots to Nigeria and wants to live in Nigeria permanently, can also apply.

C. Citizenship by Naturalization

This is for a foreigner who has lived in Nigeria for a long time and wants to become a citizen. Conditions are Must live in Nigeria for at least 15 years (or 10 years under special conditions), Must be of good character, must contribute to Nigeria (economically, socially, etc.) and Must take an oath of allegiance Example Mr. Lee, a Chinese businessman who has lived and invested in Nigeria for 16 years, can apply to become a Nigerian citizen by naturalization.

CITIZENSHIP AND CIVIC RESPONSIBILITIES

These are the duties and obligations that a citizen is expected to perform to help the country function effectively. Being a citizen comes with rights (entitlements) and responsibilities (duties).

A. Rights of a Nigerian Citizen (from Chapter IV of the Constitution)

Right Explanation

Right to life No one should be unlawfully killed

Right to freedom of Citizens can express their opinions
speech freely

Right to fair hearing Everyone is entitled to justice in court

Right to freedom of Citizens can practice any religion of religion their choice

Right to vote and be Citizens (18+) can participate in voted for elections

Citizens have a right to basic

Right to education

education

Example Amaka, a student, criticizes government policies on social media.

She is exercising her freedom of speech. Ahmed, 19, registers to vote in a general election. This is his political right.

B. Civic Responsibilities of a Nigerian Citizen

Responsibility Explanation

Obedying the law Follow rules set by the government

Citizens must pay income tax, VAT, etc., to support

Paying taxes

government services

Voting in elections Participate in choosing leaders

Join the army or support defense in times of national

Defending Nigeria

threat

Reporting crimes Inform the police about any illegal activity

Respecting national

Such as the national flag, anthem, and coat of arms

symbols

Promoting peace and Avoid tribalism, religious conflict, and support

unity national integration

Examples Chinedu pays his business tax to the government — fulfilling his

civic duty. Halima votes during the gubernatorial election in Kano —

performing her responsibility as a citizen. Olu refuses to give or accept

bribes — obeying the law and promoting honesty.

WHAT ARE INDIGENOUS LANGUAGES?

Indigenous languages are the native languages spoken by the original

people of a specific region or community. These languages are passed down

from generation to generation and are often tied to ethnic identity,

culture, and tradition. In Nigeria, there are over 500 indigenous

languages, making it one of the most linguistically diverse countries in the

world.

Examples of Indigenous Nigerian Languages

Langua Ethnic

Region/State

ge Group

South West (Lagos, Oyo, Osun,

Yoruba Yoruba

Ondo, Ekiti)

North (Kano, Kaduna, Sokoto,

Hausa Hausa

Katsina)

South East (Anambra, Imo, Abia,

Igbo Igbo

Enugu)

Efik Efik Cross River

Tiv Tiv Benue State

Ibibio Ibibio Akwa Ibom

Kanuri Kanuri Borno State

Nupe Nupe Niger and Kwara States

Ijaw Ijaw Bayelsa, Rivers, Delta

Usage of Indigenous Languages

Indigenous languages are used in various aspects of Nigerian life, such as

A. Family and Community Life

Most Nigerian children first learn to speak their mother tongue at home.

Families use indigenous languages to tell stories, teach morals, and pass on traditions. Example In a Yoruba household in Ibadan, the children may speak Yoruba at home even though they are taught in English at school.

B. Education

The National Policy on Education encourages the use of indigenous languages in early childhood and primary education (especially in the first 3 years). Some schools teach pupils in their mother tongue to help them understand better. Example: In rural Enugu, some public primary schools teach in Igbo in lower classes before switching to English.

C. Media and Entertainment

Many radio and TV stations broadcast in local languages. Indigenous languages are used in music, movies, comedy, and cultural festivals. Examples Wazobia FM broadcasts in Pidgin, which many Nigerians relate to. Africa Magic Yoruba and Africa Magic Hausa air movies and series in those languages.

D. Religion and Worship

Indigenous languages are commonly used in churches, mosques, and traditional religious ceremonies. Example A Sunday service in an Anglican

church in Anambra may be conducted in Igbo to engage the local congregation.

E. Government and Public Engagement

Some state governments use local languages to address their citizens, especially in public announcements. Example During the COVID-19 pandemic, announcements in Kano were made in Hausa to ensure people understood safety instructions.

DEVELOPMENT OF INDIGENOUS LANGUAGES IN NIGERIA

Despite the rich linguistic heritage, many indigenous languages face decline due to factors like urbanization, globalization, and preference for English. To preserve and develop them, several efforts are being made:

A. Language Education and Curriculum Development

The Nigerian Educational Research and Development Council (NERDC) includes major indigenous languages in the school curriculum. WAEC and NECO offer exams in Hausa, Igbo, and Yoruba. Example: A student in Lagos can choose to write Yoruba Language in WAEC.

B. Translation and Publishing

Books, newspapers, and religious texts are translated into indigenous languages. Example: The Bible and Qur'an have been translated into several Nigerian languages including Hausa, Yoruba, and Igbo.

C. Media and Technology

Radio and TV promote indigenous languages. Local language keyboards, mobile apps, and websites are now being developed. Example The Google Translate app supports major Nigerian languages like Yoruba and Igbo.

D. Cultural Festivals and Language Days

States organize cultural days to promote language, music, dance, and dress. Example: Igbo Day, Yoruba Day, and Hausa Cultural Day are observed to celebrate indigenous culture and language.

E. Research and Documentation

Universities and linguists' study and document Nigerian languages to preserve them for future generations. Example the Centre for Igbo Studies at the University of Nigeria, Nsukka, promotes research on the Igbo language.

Challenges Facing Indigenous Languages

Challenge Effect

Parents may not teach children local

Preference for English

languages

Children grow up in cities where English or

Urbanization and migration

Pidgin is more common

Lack of government

Policies exist but are not always implemented

enforcement

Insufficient materials and Few books and learning tools in indigenous

resources languages

Negative attitude towards

Seen as “local” or less modern

local languages

Solutions to Promote Indigenous Languages

- i. Encourage parents to speak mother tongues at home.
- ii. Provide teacher training and materials in local languages.
- iii. Enforce use of indigenous languages in early education.
- iv. Invest in local content production (TV, books, apps).
- v. Celebrate language and cultural diversity in schools and media.

NEGATIVE ATTITUDES AND CONDUCTS

Negative attitudes and conducts refer to unacceptable behaviors or actions that go against societal values, laws, and moral expectations. These behaviors are harmful to individuals, communities, and the nation as a whole. They often lead to Loss of lives, Social instability, Poor image of the country and Hindrance to national development

Cultism

Cultism is the practice of belonging to a secret group or society, often with violent rituals, illegal activities, and strict loyalty to the group. The Effects are School violence, Drop in academic performance, Death or injury and Increased insecurity. It is Characteristic by Secret meetings, Use of dangerous weapons, Blood oaths and initiation rituals and Rivalry between cult groups leading to violence. Examples In many Nigerian universities (e.g., UNIBEN, LASU, UNIPORT), clashes between cult groups like Black Axe, Buccaneers, and Eiye have resulted in the deaths of students. Cult groups have extended their operations beyond campuses to towns and villages, causing insecurity.

Kidnapping

Kidnapping is the unlawful act of seizing, abducting, or carrying away a person against their will. It is a serious criminal offense and has become one of the major security threats in Nigeria.

Types of Kidnapping in Nigeria

Kidnapping is the illegal act of taking someone by force, often to demand ransom money or for political/religious reasons. There are different types of kidnapping, based on the motive or persons involved.

i. Kidnapping for Ransom

This is the most common type of kidnapping in Nigeria. It involves abducting someone and demanding money from the victim's family or associates before releasing them. It is Characteristics by Victims who are chosen based on perceived wealth or influence. Ransom demands can range from a few thousand to millions of naira. Kidnappers use mobile phones or messengers to negotiate. The Effects are Emotional trauma for victims and families, Financial loss, Reduced investment and tourism and Fear and insecurity Examples In Kaduna State (2021), over 140 students from Bethel Baptist High School were kidnapped by bandits who demanded millions in ransom. In the South-East, especially Anambra and Imo States, wealthy individuals, business owners, and politicians have been targets. In Ondo and Edo States, commercial drivers and their passengers have been kidnapped on highways and released after paying ransom.

ii. Kidnapping by Terrorists (e.g., Boko Haram/ISWAP)

This type of kidnapping is carried out by terrorist groups, usually for political, religious, or ideological purposes. It may also involve using kidnapped victims as leverage or forced recruits. It is Characteristic by Victims are often school children, government workers, or villagers in the North-East. Sometimes used for propaganda or bargaining with the government. Often linked with violent attacks, displacement, and destruction. The Effects are Mass fear in Northern Nigeria, Closure of schools, especially for girls, strengthening of terrorist networks and Increased displacement and refugee crisis Examples Chibok Girls (2014): Boko Haram kidnapped 276 schoolgirls in Borno State. Some were forced into marriages or became suicide bombers. Dapchi Girls (2018): 110 girls were abducted by Boko Haram from a school in Yobe State; most were released except Leah Sharibu, who refused to renounce Christianity. ISWAP (Islamic State West Africa Province) has kidnapped aid workers, soldiers, and villagers for both ideological and financial purposes.

iii. Political or Ritual-Related Kidnapping

A. Political Kidnapping

This involves abducting a politician, activist, or opponent to intimidate, silence, or gain political advantage. Examples During election seasons, political opponents or their family members are sometimes kidnapped to cause fear or prevent them from campaigning. In Bayelsa State (2019), a politician's relative was kidnapped a few days before elections.

B. Ritual-Related Kidnapping

This is when victims (especially children, women, or albinos) are abducted for ritual purposes, such as money-making charms, political power, or spiritual protection. It is Characteristics Victims are often killed and body parts used for rituals. Common in both rural and urban areas. Often linked to traditional beliefs in "money rituals". The Effects are Increased fear and distrust in communities. Loss of innocent lives. Damage to Nigeria's image. Promotion of superstition and criminal activity Examples In Ogun State, several cases of children disappearing have been linked to ritual killings. In Anambra, a man was arrested for killing a woman and removing her organs for ritual purposes. Some kidnappers claim they were told by native doctors that killing someone would make them rich or powerful.

Corruption

Corruption is the dishonest or fraudulent use of power for personal gain, often involving bribery, embezzlement, and nepotism. The Effects are Poor infrastructure, Poverty and unemployment, Lack of trust in government and Underdevelopment Examples Political leaders diverting public funds meant for roads, schools, and hospitals. Some police officers collecting bribes at checkpoints. Ghost workers on government payrolls, inflating wage bills.

Drug Abuse

Drug abuse is the excessive or improper use of drugs without medical supervision, especially to feel high or escape problems. The Effects are Mental illness, School drop-out, Criminal behavior and Family breakdown Common Drugs Abused in Nigeria Tramadol, Codeine syrup, Cannabis (Indian hemp), Methamphetamine ("Ice") and Rohypnol Examples In Northern Nigeria, many young people abuse codeine syrup, leading to addiction. NDLEA has arrested drug traffickers across airports like MMIA Lagos and Abuja.

Cybercrime (Yahoo Yahoo)

Cybercrime involves using the internet to commit fraud, identity theft, or scams. Effects Poor international image, Arrest of Nigerians abroad, Youth involvement in crime and Social pressure for quick wealth Examples "Yahoo Boys" send fake emails or use social media to deceive foreigners and Nigerians. Some now engage in Yahoo Plus — a combination of fraud and ritual killings to make money.

Examination Malpractice

This is any illegal act by a student, teacher, or examiner to cheat during examinations. The Effects are Poor quality graduates, Loss of value in certificates and Lack of academic integrity Examples Students paying money to get exam answers. Teachers helping students in NECO or WAEC.

"Miracle centres" that allow mass cheating.

Paper 10 of 11 — GST 112 Colonial Rule Lecture Note

Level 100 • Second Semester • Handout

PRE-COLONIAL NIGERIA,

Pre-colonial Nigeria was not a country but it is made up of different ethnic groups, kingdoms, empires, and regions, each with its own Government, Culture, Language and Laws but interacted through trade, war, and diplomacy. Pre-colonial Nigeria includes empires like the Sokoto Caliphate, Benin Kingdom, and Yoruba states, alongside Igbo village democracies and Islamic Hausa city-states. Each had its own government, religion, and economy, making the region highly sophisticated before British colonization. Pre-colonial Nigeria was politically diverse. Some groups had strong kings and armies, others practiced democracy through councils, while some shared power between chiefs and priests. A few lived in small family-based communities with no formal rulers.

Major Pre-Colonial Kingdoms and Empires

1. The Sokoto Caliphate (Northern Nigeria) Founded in 1804 by Usman dan Fodio, a Fulani Islamic reformer. He was a theocratic Islamic empire. Sokoto Caliphate was the largest in West Africa at its time, spanned most of northern Nigeria and parts of Niger and Cameroon, and is governed through a centralized system of leadership called emirs and Islamic law (Sharia).
2. The Kanem-Bornu Empire Dates back to around the 9th century in the northeast, operate centralized system of Government led by the Sayfawa dynasty for over 1,000 years and was a hub of Islamic scholarship, trans-Saharan trade, and governance.
3. The Hausa City-States Located in present-day northern Nigeria (e.g., Kano, Katsina, Zaria). Independent but related states engaged in commerce, craftwork, and Islamic learning and controlled trade routes and had elaborate monarchies.
4. The Yoruba Kingdoms (Western Nigeria) practiced a monarchical system with Obas (kings) and councils. Have Notable kingdoms which include: Oyo Empire is famous for its strong cavalry and centralized administration and Ife is regarded as the spiritual heartland of the Yoruba, known for bronze art and early city-states.
5. The Benin Kingdom (Midwest Nigeria) Flourished from the 11th to 19th century.
Known for advanced city planning, bronze artwork, and diplomatic relations with Europe (e.g., Portuguese in the 15th century). Benin Kingdom Ruled by the Oba of Benin.
6. The Igbo Societies (Southeast Nigeria) mostly decentralized, without kings. Organized through village councils, age grades, and title

societies (e.g., Ozo title). They are known for the Aro Confederacy,

1 | Page

which controlled trade and religious influence through the Ibini Ukpabi oracle.

Economic and Trade Systems

Different ethnic groups were deeply involved in agricultural produce such as yam, millet, maize, groundnuts, palm produce, cotton, hunting and fisheries some involved in craftwork like blacksmithing, pottery, weaving, leatherwork. Trade was important, both locally and over long distances. Cowries, manilas, and barter were used as means of exchange. Trans-Saharan trade linked Northern pre-colonial Nigeria to North Africa. Goods traded included salt, textiles, horses, gold, kola nuts, and slaves. Kingdoms and empires provided security for traders along major trade routes. Coastal trade involved Europeans who came for palm oil, ivory, and slaves

Education

Pre-colonial Nigeria education is giving a child education outside school setting and is mostly informal and practical. Children learned from parents, elders, or through apprenticeships. Skills, customs, moral values, and history were taught orally. Except in Northern Nigeria where Islamic education was common, with Quranic schools teaching reading, writing in Arabic, and Islamic studies.

Religion and Culture

Islam: Spread mainly through northern Nigeria via trade and scholars.
Traditional African religions: Practiced widely across all regions, Belief in a supreme God, Worship of deities, spirits, and ancestor's and Rituals. Sacrifices, and festivals were common.
Christianity began to spread in some coastal areas through European missionaries towards the end of the pre-colonial period. Culture in pre-colonial Nigeria was rich and diverse, shaped by language, dress, food, festivals, arts, social systems and religion. Each ethnic group had unique tradition but share common African culture

Politics

Politics Varied from one ethnic group to another.

□ Centralized System Is A political system with a central authority (king, sultan, or emperor) who rules over a unified state with laws, taxation, and military.

Practiced by: Sokoto Caliphate (Usman dan Fodio) – Islamic theocracy with centralized emirates, Oyo Empire – Central government led by the Alaafin and Oyo Mesi, Benin Kingdom – Ruled by

2 | Page

the Oba with administrative structure, Kanem-Bornu Empire – Ruled by the Mai with a large bureaucracy, Igala and Nupe Kingdoms – Had kings and organized government

These societies had kings, armies, taxes, written laws, and structured governance.

□ Acephalous System (“A-” = without, “Cephalous” = head)

A stateless or leaderless political system; governance is done through councils, elders, age grades, not monarchs.

Practiced by: Igbo societies (Eastern Nigeria), Tiv and Idoma (Middle Belt), Some Gwari (Gbagyi) and Berom communities. No kings; decisions made collectively by elders, age grades, and titleholders. Leadership was shared and rotational.

□ Polycephalous System (“Poly” = many, “Cephalous” = heads) A system with multiple authorities or power centers; kings, councils, religious leaders, and elders share power.

Practiced by: Yoruba states (e.g., Ife, Ijebu, Ekiti) – Obas ruled with councils and powerful guilds, Benin Kingdom – The Oba ruled but chiefs and palace guilds also held influence

Aro Confederacy – Religious and economic powers shared between Aro priests and local elders. These societies had both kings and strong councils; power was not absolute in one person.

□ Small Band System had to do with Small, kin-based groups often led by a chief, elder, or family head; used mostly in nomadic or hunter-gatherer societies.

Practiced by: Some minor ethnic groups in remote parts of: Taraba, Plateau, Bauchi, Cross River, etc. Possibly by earlier ancestral Nigerian groups (e.g., pre-Nok)

These groups were small, mobile, and lived in clans or extended families with no formal government.

Summary

Political System Practiced By

Centralized Sokoto, Oyo, Benin, Kanem-Bornu, Igala, Nupe

Acephalous Igbo, Tiv, Idoma, Gwari, Berom

Polycephalous Yoruba kingdoms, Benin, Aro

Confederacy

Small Band Smaller ethnic groups in remote

3 | Page

System forest/hill areas

Law

Law was based on customs, traditions, and taboos. Disputes were settled by elders, chiefs, priests, or kings. Punishments could be: Fines, Restitution, Exile and Corporal punishment
In the north, Islamic (Sharia) law was applied where Islam was strong.

NIGERIA UNDER COLONIAL RULE

The colonial history of Nigeria is a critical part of her national evolution. The advent and administration of British colonial rule brought significant changes to the country's political, economic, and social systems. While it unified diverse territories into a single nation, it also sowed the seeds of future conflicts and underdevelopment. Understanding Nigeria's colonial past is essential for addressing its present challenges and shaping its future.

Advent of Colonial Rule in Nigeria

□ European Contact

European contact began in the 15th century with the Portuguese who came in through the coastal trade, with a major focus on the trans-Atlantic slave trade. However, the British penetrate about 18th century and become the most influential in 19th century, then abolish slavery and shift towards legitimate commerce such as palm oil, ivory, and other natural resources.

□ British Expansion and Military Intervention

By the mid-19th century, Britain began to establish more formal control. In 1861, Lagos was annexed and declared a crown colony. The place where the British crown govern Nigeria through government department in London is call colonial office. By the late 19th century, British established companies such as the Royal Niger Company used a combination of trade, diplomacy, and military force to dominate the interior regions. The Berlin Conference of 1884–1885 gave European powers legal authority to colonize Africa, and Britain claimed Nigeria as part of its sphere of influence.

□ Formation of Protectorates

4 | Page

In 1900, the British government formally took over territories controlled by the Royal Niger Company, establishing: The Northern Protectorate, The Southern Protectorate and The Colony of Lagos These areas were initially administered separately until their eventual amalgamation.

Colonial Administration of Nigeria

□ The Amalgamation of 1914

In 1914, under Governor-General Lord Frederick Lugard, the British amalgamated the Northern and Southern Protectorates and the Colony of Lagos into one political entity called Nigeria. This move was motivated

largely by administrative convenience and economic efficiency. However, it ignored the significant ethnic, cultural, and religious differences among the regions.

□ The Indirect Rule System

Lugard introduced and implemented the indirect rule system, is a colonial administrative strategy that ruled through existing traditional rulers like emirs, obas, and chiefs. These local leaders maintained laws, collected taxes, and administered justice, but were under the supervision of British colonial officials. Indirect rule was cost-effective but worked better in areas with centralized kingdoms, like the North, Moderately effective in the west, where Yoruba kings (Obas) had defined authority. Problematic in the east, where the Igbo lacked centralized leadership, resulting in the imposition of warrant chiefs, often leading to resistance. Resistance to colonial rule means efforts by Nigerians to oppose, protest, or fight against British control and policies during the colonial period (late 19th century to 1960).

□ Structure of Colonial Government

The British administered Nigeria through a hierarchical colonial system. The Governor-General was the highest authority, reporting to the British Crown. Nigeria was divided into Regions, each led by a regional governor. Regions were divided into Provinces, headed by Residents or Commissioners. Provinces were subdivided into Districts, managed by District Officers. At the local level, Native Authorities (chiefs, emirs, obas) governed under Indirect Rule.

5 | Page

Legislative and Executive Councils existed, but the British held most power. The system allowed Britain to control Nigeria cheaply but caused regional differences and sometimes ignored local cultures.

□ Colonial Economy and Infrastructure

The colonial economy refers to the economic system established by the British in Nigeria between 1861 and 1960, designed primarily to benefit Britain rather than Nigerians. It focused

1. Export-Oriented Economy Focused on producing raw materials for export to Britain: Palm oil and palm kernels, Cocoa, Groundnuts (peanuts), Cotton, Rubber, Tin and coal, British industries used these materials to produce goods sold back to colonies.

Goal: Is to Make Nigeria a supplier of raw materials and a market for British goods.

2. Cash Crop Production Farmers encouraged (sometimes forced) to grow cash crops instead of food crops. Led to: Shift from subsistence farming to cash crop farming. Food shortages in some regions because fewer food

crops were grown. Cocoa in Western Nigeria (Yoruba land) became a major export crop.

3. Exploitation of Mineral Resources - British companies mined Tin (Jos Plateau), Coal (Enugu), Gold and limestone (in smaller quantities) Minerals exported to Britain for manufacturing. Example: Coal from Enugu powered ships and railways.

4. Development of Transport Infrastructure

Railways and roads built mainly to extract resources. Rail lines connected: Mining areas to ports (e.g., Lagos, Port Harcourt) Agricultural regions to ports Transport system designed to move goods, not necessarily for local development. Example: Lagos to Kano railway facilitated groundnut exports from the North.

5. Introduction of a Monetary Economy- British introduced: British currency (pounds, shillings, pence). Cash payments instead of barter. Taxes collected in cash (e.g. hut tax, a tax imposed by colonial governments on each hut or household in a village. The word “hut” referred to a dwelling place, so the tax was basically a payment for each house people lived in.), forcing Nigerians into wage labor or cash crop farming. Monetary Economy is an economic system where people buy and sell goods and services using money rather than exchanging goods directly (barter). Effects of Money Economy could Positive Effects which are Connected Nigeria to world trade, Helped some Nigerians get rich through trade and Encouraged savings and banking. Or Negative Effects which includes Replaced traditional systems,

6 | Page

causing confusion at first, Created economic inequality, Forced people into cash economy even if they preferred subsistence farming and Led to cash crop farming, causing food shortages in some areas.

6. Foreign Trade Dominated by Britain -Nigeria was supplier of raw materials. A market for British manufactured goods (textiles, machinery, household items). Trade policies discouraged Nigerian industries from competing with British goods. Example: Cheap British textiles undermined local cloth production.

7. Taxation and Forced Labour -Colonial government imposed taxes: Hut tax and Poll tax(a tax charged on every adult person (usually men), regardless of income or property, the word “poll” means head so it’s a tax per head.), sometimes enforced with forced labor: by Building roads, Railways and do Public works

8. No Industrialization

Colonial policies discouraged local manufacturing to avoid competition with British industries. Nigeria exported raw materials and imported finished goods. Result in Economic dependence on Britain.

9. Regional Economic Differences Economic activities varied across regions:

North: Groundnuts, cotton, West: Cocoa East: Palm produce Middle Belt:

Tin mining these Led to economic imbalance between regions.

□ Effects of the Colonial Economy

Positive Effects was Development of ports, railways and roads, Introduction of cash economy and Exposure to global trade.

Negative Effects was Economic exploitation, Focus on raw materials, no industries, Food shortages due to cash crop farming, Regional inequalities, Economic dependence on Britain and Environmental degradation from mining and cash crop farming.

□ Education and Religion

During colonial rule, missionaries introduced Western education in Southern Nigeria, while the North remained largely Islamic with limited Western schooling. Education focused on literacy and Christian teachings, creating an educated elite. At first, the British government left education to missionaries. Later Colonial government began funding schools. Introduced Education Ordinances 1882 to regulate education in Lagos. 1926 Education Code to improve standards. An Education Ordinance was a colonial law or regulation made by the British government to control, organize, and supervise schools in the colonies. Think of it as “rules for how schools should run.” Christianity spread in the South, while the north remained largely Muslim, with less access to Western education due to British support for Islamic institutions and reluctance to disrupt traditional systems.

7 | Page

□ Effects and Legacy of Colonial Rule

Colonial rule left a mixed legacy in Nigeria: It introduced modern systems of administration and education. It unified diverse peoples under a single political framework but without resolving deep ethnic, regional, and religious differences. Economic structures remained underdeveloped and export-oriented. Political consciousness grew, laying the groundwork for nationalist movements and Nigeria’s eventual independence in 1960.

Paper 11 of 11 — GST 112 Summary

Level 100 • First Semester • Handout

This source paper is a scanned document; its pages are reproduced below.

GSE112 SUMMARY BY KISORANKING SAM.	
+ POSSIBLE TEST & EXAMINATION QUESTIONS.	
1. What is a Library? A Library is the collection of information sources, resources, services and the structure in which they are kept. 2. Types of Libraries * Academic Library: They are found in higher institutions. * National Library: They are majorly for use by the citizens of a country but does not allow borrowing of books. * Public Library: They are established by the govt. through public funding to serve members of the community. They allow the borrowing of books. * School Library: They are found in secondary or intermediate schools. * Special Library: They are also known as "research library". They are mainly established by corporate organisations. Their services and books are very focused on a particular field where it is established. 3. Services in a Library * Circulation Service: Registration print. * Reference Service * Inter-Library Loan Service * E-Library Service * Current Awareness Services * Technical Services	4. Information Resources These are library materials ready for the library users to gain the necessary information they need. Information Resources are further classified into two; + Print and Non-Print Sources Print Sources: These are materials in printed format required by libraries to meet the information needs of library users. They are usually found on the open shelves in the reading area and in the Serial Serial unit of the library. Non-Print Sources: They are usually accessible with the aid of electronic devices. Some non-print sources are video, audio, CD-Rom, graphic & digital materials. Information Resources are also grouped into: Non-Reference Sources Reference Sources Reference Sources are; Dictionaries, Encyclopedia, Gazetteer, Maps & Atlases, etc. Non-reference Sources are Periodicals, Books/Monographs, etc.

Scanned by CamScanner

5. Book

A Book is any document that has a collection of 49 pages or more that are bound together with a distinctive title.

A Book is called a **MONOGRAPH** if it has different volumes.

6. Parts of a book & description.

* **Binding** - This is the edge holding the leaves together. It is usually made up of the Spine & Cover, which are the backbone & the protective Page of the book respectively.

* **Preliminary Pages** - These are pages that carries Table of contents, the publisher, etc and are numbered in Roman numerals.

* **Text** - This is the main body of the book.

* **Auxiliary or Reference pages** - These are the ending pages of a book that carries, references, appendix, etc.

7. What is Cataloguing?

This is the art of describing a material in bibliographic term. Such Bibliographic term includes; authors, title, Publisher, place of publication, year of publication, number of pages, edition, Volume, Series, ISBN, etc.

Types of Cataloguing

- * Book Catalogue
- * Card Catalogue
- * Online Public Access Catalogue (OPAC)

8. What is ISBN

ISBN → International Standard Book Number

9. What is ISSN?

ISSN → International Standard Serial Number.

10. Information Sources and resources are;

- * Books
- * Periodicals
- * Open Access
- * Internet
- * Reference materials
- * Communication Devices

11. What are Periodicals?

These are materials published at regular intervals, maybe monthly or quarterly. e.g, Journal articles & Magazine articles.

12. Differences Between a Journal Article and a Magazine Article.

* Journal Articles are made for specific disciplines, e.g, medicine.

Magazine Articles are aimed at the general public.

* Journal Articles are longer, while the magazine articles are shorter.

* Journal articles have no attractive image but the magazine articles have eye-catching images & diagrams for easy understanding.

* Journal articles are usually very formal but the magazine articles are generally informal.

13. What are the names of your Lecturers?

Scanned by CamScanner
