FEDERAL UNIVERSITY OF PETROLEUM RESOURCES, EFFURUN

MATL 215 — Past Questions & Materials
by Renance

Course: MATL 215
Institution: Federal University of Petroleum Resources, Effurun
Papers in this pack: 1
Levels: 200

This study pack was compiled and restructured by Renance for MATL 215 students at Federal University of Petroleum Resources, Effurun. It brings together 1 past paper(s)/material(s) into one clean, readable document so you can revise without chasing scattered PDFs. Practise these same questions interactively on Renance with instant answers, AI explanations, and full CBT mock exams — over 235,000+ questions across JAMB, Post-UTME, WAEC, NECO and university courses.

Study online: renance.app

Paper 1 of 1 — MATL 215 - 2024/2025 - First Semester - Ports and Logistics

Level 200 • First Semester • PastQuestion

This source paper is a scanned document; its pages are reproduced below.

DEPARTMENT OF MARITIME TRANSPORT AND LOGISTICS
COLLEGE OF MARITIME AND OFFSHORE STUDIES
FEDERAL UNIVERSITY OF PETROLEUM RESOURCES, EFURUN.
FIRST SEMESTER EXAMINATION, 2024/2025 SESSION
COURSE: PORTS AND LOGISTICS
COURSE CODE: MATL 215, TIME: 2 HOURS

INSTRUCTIONS: ANSWER ANY FOUR QUESTIONS. EACH QUESTION CARRIES EQUAL MARKS

Question 1

- What are the functions of ports in global supply chain (6 marks)
- State and explain the core components of logistics operations (6 marks)
- Define incoterms and explain two incoterms you have studied (5.5 mark)

Question 2

Discuss the following port facilities:

- Terminal (6 marks)
- Berths (6marks)
- Storage areas (5.5 marks)

Question 3

- Explain the cargo handling methods for bulk, breakbulk and containerized cargoes (6 marks)
- Discuss the major shipping routes (6 marks)
- Highlight the major challenges of global shipping routes (5.5 marks)

Question 4

- Differentiate between a hub and a spoke port in terms of their roles (6 marks)
- State the advantages of the hub-and-spoke model (5.5 marks)
- State three challenges of hub-and-spoke model and three examples of hub ports with their peculiarities (6 marks)

Question 5

- Differentiate between intermodal and multimodal transport (5.5 marks)
- State the advantages of intermodal and multimodal transport (6 marks)
- Discuss the features of smart ports (6 marks)

Question 6

- Discuss the Key Elements of Emergency Preparedness in seaports (6 marks)
- Highlight the safety protocols that are observed in seaports (6 marks)
- Discuss the environmental impacts of port operations (5.5 marks)

FEDERAL UNIVERSITY OF PETROLEUM RESOURCES

EFFURUN, DELTA STATE

COLLEGE OF MARITIME AND OFF SHORE STUDIES

FIRST SEMESTER UNDERGRADUATE EXAMINATION 2024/2025 ACADEMIC SESSION

COURSE CODE/TITLE: MAEF 201, / MARITIME ECONOMICS, TIME: 2 HOURS.

DATE: 6th MAY, 2025. INSTRUCTION: ANSWER ANY THREE QUESTIONS.

- 1 What is Maritime Economics?
 - b. List and explain the importance of Maritime Economics? (23.3)
- 2 Discuss the functions of shipping in Nigeria's Economic growth
 - b. Explain in details the meaning of shipping. (23.3)
- 3 Discuss government economic investments and financial policies in the maritime sector
 - 3b what are the key aspect of competition in shipping industry? (23.3)
- 4 Write short note on the cost structure of shipping operations in Nigeria. (23.3)
- 5 List and explain five types of demand. Is it true that sea port activities is a derived Demand?
 - b) What are sea port activities? 23.3)

Course lecturer: Prof. D.B Ewubare

FEDERAL UNIVERSITY OF PETROLEUM RESOURCES, EFFURUN
COLLEGE OF MARITIME AND OFFSHORE STUDIES
DEPARTMENT OF MARITIME TRANSPORT AND LOGISTICS
FIRST SEMESTER EXAMINATION, 2024/2025 SESSION
COURSE TITLE: PRINCIPLES OF MANAGEMENT (2 CREDIT UNITS)
COURSE CODE: MAEF 211 TIME: 3 HOURS

INSTRUCTIONS: ANSWER ANY FOUR (4) QUESTIONS. ALL QUESTIONS CARRY EQUAL MARKS

1. (a) Define the term "Business Environment". (5marks).
(b) Mention and briefly explain any five business environment types known to you. (2.5 marks, each).
2. You have been appointed Awaritse Shipyard Manager, clearly identify and explain seven managerial resources you need to carry out your duties. (2.5 marks, each).
3. Write short notes on the following principles of Administrative Management by Henry Fayol:
(a) Division of work. (b) Authority. (c) Discipline. (d) Remuneration. (e) Equity. (3.5 marks, each).
4. (a) List and briefly explain four principal arguments by Frederick Taylor in his Scientific management.
(b) What is systematic soldiering? (3.5 marks, each).
5. (a) Express any two definitions of Management. (7 marks, each).
(b) What is natural soldiering? (3.5marks).
6. State and briefly explain any five benefits of the knowledge of Principles of Management to your career as Transport and Logistics Manager. (3.5 marks, each).

DEPARTMENT OF MARITIME TRANSPORT
FIRST SEMESTER EXAMINATION (2024/2025 ACADEMIC SESSION)
COURSE TITLE & CODE: MARITIME ENVIRONMENTAL REGULATION AND MANAGEMENT, MS 205
TIME: 1 HR, 45 MINS, DATE: 15/05/2025

Instruction

- READ THE QUESTIONS CAREFULLY BEFORE ANSWERING ANY QUESTION
- AVOID THE USE OF SMARTPHONE AND SMART WATCH
- ANSWER QUESTION ONE AND ANY OTHER TWO QUESTION'S ONLY

QUESTION ONE (Compulsory)

MV SEWOL, a 1200 tons South Korean ferry loaded with 2000 tons of cargo was given a safety certificate by the port regulators and sank after leaving the port while en-route from Incheon which resulted to the death of 300 persons including passengers. Applying the knowledge of the international Maritime Organization (IMO) conventions:

- a) Discuss the possible factors responsible for the sinking of the ferry and evaluate the competency of the ferry crew and port regulators with respect to safety of life at sea [7 marks]
- b) Judging from the outcome of your evaluation in part "a", what could be missing with respect to safety measure's looking at the population of dead passenger? and what can be done to prevent further occurrence in the future? [7 marks]
- c) Considering what you have discussed to be missing in part "b", was it right for the port regulators to issue safety certificate to MV SEWOL? State your reasons [2 marks]
- d) Does this also imply that the inspections done by previous marine surveyors on MV SEWOL were valid? Kindly discuss [2 marks]
- e) Looking at the present scenario, which of the International Maritime Organization conventions were not enforced [3 marks]
- f) What are the responsibilities of the conventions mentioned in part "e"? [5 marks]
- g) Provide a general safety assessment of your findings on MV SEWOL to IMO and suggest what should be done to the Captain and other crew assuming you are task as the prosecutor [4 marks]

QUESTION TWO

Looking at the maritime environment where ship engine's utilize fossil fuels to provide propulsion and power for electrical supply, the need to actualize the IMO acts of 30% reduction is crucial. Hence;

- a) Discuss the possibility of achieving green ship and recommend a novel means of reducing ship emission describing how it can be achieved [4 marks]
- b) Can technology facilitate green logistics? Discuss with clarity [3 marks]
- c) Discuss five negative influence of sea trade on world populations [5 marks]
- d) Judging from your personal knowledge derive from the course, recommend three novel solutions that can be adopted to improve the Niger Delta Waterways to the Nigerian Maritime Administration and Safety Agency [4 marks]
- e) Looking at the case study examine in your term paper assignment, do you think NIMASA has done well in terms of regulation and pollution prevention? Justify your reasons [4 marks]

QUESTION THREE

An oil tanker ship MV Gerald R. Ford was newly built and registered under the owner's nationality to ply Canada seas. After setting up the vessel to deadweight, the vessel sail northwest to its destination. About 12 miles away from the shore within the Canadian sea while on autopilot mode during the night hours, the vessel collided with a cargo ship resulting to a large discharge of oil to the environment. Applying the knowledge of maritime environmental regulation and management;

- a) Classify the scenario according to the three tiers of response and justify your reasons [2 mark]
- b) What are the other contributing factors leading to the event and who should be blame? [4 marks]

**FEDERAL UNIVERSITY OF PETROLEUM EFFURUN
COLLEGE OF MARITIME AND OFFSHORE STUDIES
DEPARTMENT OF MARITIME TRANSPORT AND LOGISTICS
FIRST SEMESTER EXAMINATION 2024/2025
COURSE: MARITIME LOGISTICS AND COMMUNICATION
COURSE CODE: MATL 211.
TIME ALLOWED: 3HOURS. ANSWER FOUR QUESTIONS.**

- 1a) Critically examine the scope of maritime logistics and its key areas (6 marks)
- b) Highlight the importance of Maritime Transport in Global Trade (5 marks)
- c) Marksline shipping company invited you for an interview as a SIWES student, you are asked to fully examine the key players in the maritime logistics industry (6.5 marks)
- 2ai) Global Supply Chain Management (GSCM) is very important in the maritime logistics critically, explain GSCM (2.5 marks).
- ii) State the key Structure and Components of Global Supply Chains (5 marks)
- bi) Differentiate between integrated and intermodal transport (5 marks).
- ii) Highlight the benefit of integrated transport and the key feature of intermodal transport (5 marks).
- 3a) Explain the term Port and its operation in the maritime industry (5 marks).
- b) There are different types of port and port terminals, critically elucidate them (6 marks).
- c) State the function of port and port operation (6.5 marks)
- 4a) The shipping industry plays a pivotal role in global trade and logistics, moving goods over vast distances across oceans and waterways. Critically examine types of ships and their Roles in logistics (7.5 marks)
- bi) Discuss the factors that Influence route selection during shipping operation (5 marks).
- ii) State the factors that Influence Scheduling during shipping operation (5 marks).
- 5a) Effective communication is vital in maritime operations, discuss (5 marks).
- b) Highlight various types of maritime communication (6.5 marks)
- c) State various International Standards and Regulations in the shipping industry (6 marks).
- 6a) You are invited for an interview in the traffic department, Nigeria Port Authority, Warri to explain key communication systems used in Navigation for effective maritime operation (9 marks).
- b) Differentiate between the three main types of Charter Parties. What is the primary distinction between a Voyage Charter Party and a Time Charter Party? (8.5 marks)

FEDERAL UNIVERSITY OF PETROLEUM RESOURCES, Effurun, Delta State
COLLEGE OF MARITIME AND OFFSHORE STUDIES
DEPARTMENT OF MARITIME ECONOMICS AND FINANCE/TRANSPORT & LOGISTICS
FIRST SEMESTER EXAMINATIONS [2024/2025 Session]
MS 203: MARITIME LEADERSHIP AND MANAGEMENT **Duration: 2 Hours, 30 mins**

Section A – [Multiple Choice Objective Questions] (1 mark each) - ANSWER ALL QUESTIONS IN THIS SECTION

1. Which of the following best defines maritime leadership?
 - A) The ability to navigate vessels safely; B) The skill of managing people and resources in maritime environments
 - C) The process of owning ships and conducting shipping operations; D) The knowledge of maritime law
2. A key trait of effective maritime leaders is:
 - A) Inflexibility; B) Emotional intelligence; C) Lack of communication; D) Fear of decision-making
3. Which document outlines the responsibilities and authority of a ship's captain?
 - A) Safety Management System (SMS); B) Crew Contract; C) Master's Standing Orders; D) Vessel Registry
4. The International Maritime Organization (IMO) primarily focuses on:
 - A) Ship construction; B) Shipping profitability; C) Maritime safety and environmental performance; D) Crew wages
5. What does the ISM Code stand for?
 - A) International Safety Management Code; B) International Shipping Management Code
 - C) International Standards of Management Code; D) International Ship Maintenance Code
6. Which principle is NOT part of effective shipboard personnel management?
 - A) Continuous Training; B) Isolation; C) Performance Evaluation; D) Clear Communication
7. What is the primary purpose of Standard Operating Procedures (SOPs)?
 - A) To confuse crew members; B) To ensure uniformity in operations; C) To increase the time needed for training
 - D) To reduce regulatory compliance
8. Which of the following is an example of a workload management principle?
 - A) Overloading crew members; B) Effective delegation of tasks; C) Avoiding communication; D) Ignoring crew feedback
9. National legislation in maritime shipping often addresses:
 - A) Ship aesthetics; B) Crew entertainment; C) Safety and operational standards; D) Interior design of ships
10. Which technique is vital for risk assessment in decision-making?
 - A) Guesswork; B) Statistical analysis; C) Ignoring previous incidents; D) Relying solely on experience
11. What is the significance of crew resource management (CRM)?
 - A) It promotes rigid hierarchy; B) It emphasizes teamwork and effective communication
 - C) It disregards situational awareness; D) It focuses only on technical skills
12. The term "flag state" refers to:
 - A) The country where a ship is built; B) The country under which a ship is registered; C) The last port visited; D) The crew's nationality
13. Energy efficiency measures on vessels aim to:
 - A) Increase fuel consumption; B) Reduce operational costs and environmental impact; C) Boost vessel speed; D) Lengthen voyage times
14. Which of the following fosters effective decision-making in a leadership context?
 - A) Ignoring team input; B) Using outdated information; C) Collaborative discussions; D) Rigid adherence to rules
15. What is an essential aspect of resource management in maritime operations?
 - A) Underutilization of equipment; B) Efficient allocation and management of manpower and materials; C) Minimal training of personnel
 - D) Solely focusing on financial outputs
16. The main goal of performance assessment in ship management is to:
 - A) Monitor crew performance only; B) Evaluate the effectiveness of various management activities; C) Hire more personnel
 - D) Increase operating costs
17. Which principle is crucial in managing workload on a ship?
 - A) Signing contracts without reviewing; B) Balancing tasks based on crew capacity; C) Giving all tasks to a single crew member
 - D) Keeping crew unaware of operational goals
18. Maritime conventions and regulations are important because they:
 - A) Ensure ships look good; B) Protect seafarers, ship owners, and the environment; C) Focus exclusively on profit
 - D) Simplify communication between crew members
19. Effective shipboard personnel management primarily contributes to:
 - A) Higher crew turnover; B) Crew dissatisfaction; C) Improved safety and operational efficiency; D) Increased ship insurance costs
20. A successful decision-making process should include:

FEDERAL UNIVERSITY OF PETROLEUM RESOURCES, EFFURN, DELTA
STATE

COLLEGE OF MARTIME AND OFFSHORE STUDIES.
2024/2025 SESSION, FIRST SEMESTER EXAMINATION

COURSE CODE: ENT 211

COURSE TITLE: ENTREPRENEURSHIP & INNOVATION

INSTRUCTIONS:

Answer only four (4) questions. All questions carry equal marks
Note: good handwriting and good presentation of work attracts bonus marks.

TIME ALLOWED: 2 HOURS.

1. (a) What is Entrepreneurship? (5marks)
(b) Outline and briefly explain five only, out of the numerous theories of Entrepreneurship. (12^{1/2} marks)
2. (a) What is Innovation? (5marks)
(b) Mention and briefly explain the six steps to Business Innovation (12^{1/2} marks)
3. (a) List and Explain at least Five (5) Barriers to Entrepreneurship (12^{1/2} marks)
(b) Outline Five Solutions to the Barriers to Entrepreneurship (5marks)
4. Give a Detailed Paraphrased Story of Ewing Marion Kauffman, Illustrating Entrepreneurship and Intrapreneurship. (17^{1/2} marks)
5. (a) There is no Partnership Business without a "Deed". Discuss! (2^{1/2} marks)
(b) Outline at least Ten things that must be enshrined in the Deed. (10marks)
(c) Mention at least five fundamental principles of a Co-operative Society (5marks)
6. Present the Biographies of Ten out of the 50 Greatest Entrepreneurs of all times in the United States of America. (17^{1/2} marks)

Good Luck

FEDERAL UNIVERSITY OF PETROLEUM RESOURCES, EFFURUN
Department of Maritime Transport and Logistics

COURSE CODE: MATL 213 (2unit Course.)
TIME ALLOWED: 2HOURS.

COURSE TITLE: TRANSPORT GEOGRAPHY
ANSWER ANY OTHER 4 QUESTIONS.

1. The geographic space present constraints and friction to movement; outline some of the constraints and barriers to transport that you know. 17.5 marks
2. Examine the view that '*Transport is a derived demand.*' 10marks
- 2b. outline at least 3 importance of Transportation 7.5marks
3. Maritime transport is associated with environmental impacts and ecosystem degradation; elaborate on the sources and causes of environmental pollution of shipping. 17.5marks
4. The Marine and Blue economy is a representation of a sustainable economic model; attempt and explanation of the meaning and components of the Blue Economy. 12.5 marks
- 4b. Two Sustainable Development Goals are related to Maritime Sector. List them. 5Marks.
5. With respect to shipping market; examine the main features that distinguish *Tramp shipping* from *Liner shipping*. 10marks
- 5b. outline the various types of Charter arrangement that you know. 7.5 marks
6. Write short note on the following:
 - i. Demise Charter
 - ii. Climate Related risks (CRR). 17.5marks.

GOOD LUCK!

Damm-oyibo Dominion oghenegisue
FEDERAL UNIVERSITY OF PETROLEUM RESOURCES, EFFURUN
DEPARTMENT OF MATHEMATICS
 B.Sc. DEGREE EXAMINATION (2024/2025), FIRST SEMESTER. MTH 201/MTH 211
 (MATHEMATICAL METHOD 1 3C). April, 2025. Duration: 2 HOURS.

Instructions: Answer question one (1) and any other three (3) questions.
 Credit shall be given for brevity and concise answers.

1. Given that $F(x, y, z) = xy^2z + \sin y - x^2 \cos z - e^{-3x} + ye^{-z}$, Evaluate the following
 - (a) $F_x - F_y - F_z$ (5 marks)
 - (b) $F_{xx} - F_{yy} - F_{zz}$ (5 marks)
 - (c) $F_{xy} - F_{yz} - F_{zx}$ (5 marks)
 - (d) $F_{xx} - F_{yy} - F_{zz}$ (5 marks)
 - (e) $F_{xxy} - F_{yyy} - F_{zzx}$ (5 marks)
2. (a) Verify the Rolle's theorem for the function $f(x) = x^2 - 9x + 14$ in the interval $[2, 7]$. (7.5 marks)
 (b) Determine all the numbers c which satisfy the conclusions of the Mean Value Theorem for the function $f(x) = x^3 + 2x^2 - x$ on $[0, 4]$. (7.5 marks)
3. (a) Find the Taylor series for the function $f(x) = e^{-\frac{1}{2}x}$ about the point $x = 0$. (9 marks)
 (b) Evaluate $\lim_{\substack{x \rightarrow 2 \\ y \rightarrow 1 \\ z \rightarrow -1}} 5xz^2 - y \cos(\pi x - \pi z)$ (6 marks)
4. (a) If $f(x, y) = (xy)^2$ and $x = a - 8u$, $y = u^3 + au$. Find $\frac{df}{du}$. (7.5 marks)
 (b) Find $\frac{\partial z}{\partial x}$ and $\frac{\partial z}{\partial y}$ if $x^2 - y^2 - z^2 - 10xyz = -5$. (7.5 marks)
5. (a) A curve is given parametrically by an equation $x = 1 + t^2$ and $y = 5t$. Find $\frac{dy}{dx}$ and the point on the curve at which $\frac{dy}{dx} = 1$. (9 marks)
 (b) Calculate the differentials of $f(x) = \cos \frac{2}{3}\pi x$ and $f(t) = e^{\frac{5}{2}\pi t}$. (6 marks)
6. (a) Prove that $\int \frac{dx}{A^2 - x^2} = \frac{1}{2A} \ln \left(\frac{A+x}{A-x} \right) + C$ (10 marks)
 (b) Evaluate $\int \frac{dx}{121 - x^2}$ (5 marks)

FEDERAL UNIVERSITY OF PETROLEUM RESOURCES,
EFFURUN.
COLLEGE OF MARITIME AND OFFSHORE STUDIES
DEPARTMENT OF MARINE TRANSPORT AND LOGISTICS
MARITIME TECHNOLOGY (MS 281) -1st SEMESTER
EXAMINATION: 2024/2025 ACADEMIC YEAR

ANSWER QUESTION 1 PLUS ANY OTHER 4. TIME: 2 HRS 30 MINS.

Question 1

- a. You are tasked with designing a cathodic protection system for an 8000m^2 ship hull with a -0.7V metal potential, 0.5 coating breakdown factor, and $0.1\text{mA}/\text{m}^2$ steel current density. The ship owner prefers long flush-mounted anodes with -1.7V potential and 0.5m by 0.12m dimensions, operating in a $2.5\Omega\text{m}$ environment. Estimate the number of anodes required for the ship's protection (6.5 mrks)
- b. What causes torsion in a ship, and what orientation of the ship to the wave leads to this condition? (3 mrks)
- c. How does slamming contribute to the structural movement known as panting, and what causes its fluctuation? (3 mrks)
- d. What physical component of dry-docking directly causes an upward stress on the keel, and what are the resulting deformations? (3 mrks)
- e. Under what condition is racking most pronounced, and what dynamic force initiates it. (3 mrks)

Question 2

- a. Why does a ship experience increased bending moment during sagging? (3.5mrks)
- b. What causes the phenomenon known as slamming or pounding, and which part of the ship is primarily involved? (3 mrks)
- c. State two (2) differences between corrugated bulkhead and plane bulkheads. (3 mrks)
- d. What are the phases of ship design process? (3 mrks)

Question 3

- a. What structural effects occurs when a wave trough is at the ends of the ship? (3.5 mrks)
- b. In your understanding, how does the distinction between internal and external static forces influence structural decision-making in ship design? (3 mrks)
- c. What are intumescent coatings, and how do they provide fire resistance on board ships? (3 mrks)
- d. State 4 primary causes of corrosion on ships (3 mrks)

Question 4

- a. Describe the type of structural deformation that occurs during racking. (3.5 mrks)
- b. What motion of the ship enhances panting effect? (3 mrks)
- c. Why are transverse and longitudinal bulkheads considered critical structural elements in ship design, while minor bulkheads are not? (3 mrks)
- d. List 3 types of corrosion that are commonly encountered in marine environment. (3 mrks)

Question 5

- a. What happens to buoyancy when a wave crest is at mid-ships? (3.5 mrks)
- b. In what way do dynamic forces introduce complexities to ship structural design beyond those posed by static forces? (3 mrks)
- c. Transverse section of a ship is vulnerable to distortion due to water pressure, what structural feature prevents it? (3 mrks)
- d. Mention 3 types of materials commonly used as sacrificial anodes for cathodic protection in marine environment. (3 mrks)

Question 6

- a. What specific structural behaviors are observed in a ship during dry-docking due to static force? (3.5 mrks)
- b. Why is it essential to consider both static and dynamic forces together when evaluating a ship's long-term structural performance? (3 mrks)

- c. In Ship design, why is it important that a design philosophy accommodates a feedback mechanism, particularly when developing an innovative vessel type such as autonomous ships? (3 mrks)
- d. What are thermal loads in the context of ships, and how do they impact ship operations? (3 mrks)

Question 7

- a. What is the definition of floodable length in ship design, and how can it impact ship safety and operations? (3.5 mrks)
- b. What does the Design Spiral analogy demonstrate? (3 mrks)
- c. What are the six degrees of freedom referenced in ship movement? (3 mrks)
- d. What is a hatchway, and why are thicker insert plates fitted around hatch corners? (3 mrks)

Goodluck! Engr. N. E. Udosoh

- A) Ignoring crew feedback; B) Comprehensive data analysis; C) Solely relying on past experiences; D) Making rapid decisions without consultation

Section B [Short Structured Questions] (5 marks each) Instruction – ANSWER ALL QUESTIONS IN THIS SECTION

1. Define maritime leadership and its role in ensuring maritime safety and operational success.
2. What are the critical components of effective shipboard personnel management?
3. Identify and describe at least two major international maritime conventions and their significance.
4. What are the best practices for effective resource management in shipping operations?
5. Discuss the significance of appropriate decision-making techniques in maritime leadership.
6. How do Standard Operating Procedures (SOPs) contribute to safety and efficiency on ships?

Section C [Essay Type Questions] (20 marks each) – ANSWER ONLY ONE QUESTION IN THIS SECTION

- (i) Discuss the foundations of maritime leadership, highlighting the key traits and skills required for effective leadership in the shipping industry. Include how these elements contribute to crew morale, safety, and operational efficiency.
- (ii) Analyze effective shipboard personnel management and training, focusing on the critical practices that enhance crew performance. Discuss how training influences decision-making capabilities and the overall safety culture on board ships.
- (iii) Evaluate the applicable task and workload management principles in maritime operations. Discuss how effective workload management can impact safety, crew performance, and operational efficiency, along with recommendations for best practices.

Scanned with
CamScanner

- c) Describe the nature of the environment where the collision has occurred and discuss the influence of the scenario on the environment [5 marks]
- d) Recommend equipment/tools that can be applied immediately to arrest the situation using a step by step approach [5 marks]
- e) Describe the convention responsible for handling the situation cited and state the possible environmental offenses committed by the vessel according to the classes of the convention and the penalties? [4 marks]

QUESTION FOUR

With respect to question three;

- a) If MV Gerald R. Ford is within the territory where it was registered, which body is responsible for resolving such event? Discuss their duties [6 marks]
- b) If upon the impact of the collision, the hull shell plating's was observed to have cracked, suggest immediate response action assuming you are the ship master and which of the SOLAS chapter is significant at the moment to adopt when the hull is partially or fully damaged? [4 marks]
- c) Judging from the scenario experience and its adverse effects on the marine environment, should sea trade persist? Provide reasons [4 marks]
- d) Looking at the world trade at large, what really is the foundation for conducting international trade? [2 marks]
- e) From the angle of competence, can we say that the STCW convention is not effective in producing standardized crews? Explain [4 marks]

QUESTION FIVE

Miami-based carnival Cruise ship while sailing in the Bahamas water dumped plastic mixed with food waste into the ocean. The port regulators raise an alarm that the ship master and his crew has committed an offence. Assuming your expert judgement is needed as a maritime environment safety personnel;

- a) Do you agree with the port regulators that an offence was committed by the ship? Discuss [2 marks]
- b) What are the effects of dumped plastic and food waste to the Bahamas water? [4 marks]
- c) Which Convention is responsible for handling such offence? [2 marks]
- d) Classify the offence according to the six ANNEXES of the convention suggested by you in part "c" [2 marks]
- e) When was the convention formed and why is it important? [5 marks]
- f) Recommend a method or an approach that assist in minimizing the dumping of plastic and waste food [5 marks]

CONGRATULATIONS ON YOUR FIRST VOYAGE.....

ENGR. CLEMENT, I. A.....
