

RENANCE

FEDERAL UNIVERSITY OF TECHNOLOGY, AKURE

CYB 201 — Past Questions & Materials

by Renance

Course: CYB 201

Institution: Federal University of Technology, Akure

Sources in this pack: 3

Includes past questions and lecture notes

This study pack was compiled and restructured by Renance for CYB 201 students at Federal University of Technology, Akure. It brings together 3 past paper(s)/material(s) into one clean, readable document so you can revise without chasing scattered PDFs. Practise these same questions interactively on Renance with instant answers, AI explanations, and full CBT mock exams — over 235,000+ questions across JAMB, Post-UTME, WAEC, NECO and university courses.

Bloomy Cybersecurity Curriculum

Module 1: CompTIA Networking+

Topics:

- Introduction to Networking
- Network Topologies
- Connectors and Cables
- Firewalls and Security Policies
- Network Components and Protocols
- IP Addressing and Subnetting

Activities:

- Configure a basic network setup
 - Identify and implement different firewall configurations
 - Practice subnetting exercises
-

Module 2: CompTIA Security+

Topics:

- Security Roles & Security Controls
- Threat Actors and Threat Intelligence
- Security Assessments & Risk Management
- Social Engineering and Malware Attacks
- Cryptographic Concepts & Public Key Infrastructure

Activities:

- Conduct a basic risk assessment
 - Identify different types of malware and prevention techniques
 - Implement cryptographic protocols in a simulated environment
-

Module 3: Ethical Hacking - Introduction

Topics:

- Introduction to Ethical Hacking

- Information Security Overview
- Security Threats and Attack Vectors
- Ethical Hacking Concepts and Principles
- Information Security Controls
- Penetration Testing Concepts and Methodologies
- Information Security Laws and Standards

Activities:

- Conduct a simulated penetration test
 - Explore real-world hacking case studies
 - Learn ethical hacking tools and frameworks
-

Module 4: Footprinting and Reconnaissance**Topics:**

- Footprinting Concepts and Techniques
- Footprinting via Search Engines & Web Services
- Social Media Footprinting
- Website & Email Footprinting
- DNS & Network Footprinting
- Social Engineering Footprinting
- Footprinting Tools and Countermeasures

Activities:

- Conduct reconnaissance on a sample target
 - Implement footprinting countermeasures
 - Use footprinting tools to gather intelligence
-

Module 5: Scanning Networks & Enumeration**Topics:**

- Network Scanning Concepts & Tools
- Host, Port, and Service Discovery
- OS Fingerprinting & Banner Grabbing
- Scanning Beyond IDS and Firewalls
- Enumeration Techniques (NetBIOS, SNMP, LDAP, etc.)
- Enumeration Countermeasures

Activities:

- Perform network scanning using Nmap
 - Conduct enumeration on a sample system
 - Analyze the effectiveness of scanning countermeasures
-

Module 6: Vulnerability Analysis & System Hacking**Topics:**

- Vulnerability Assessment Concepts
- Classification and Assessment Techniques
- Vulnerability Assessment Tools & Reporting
- System Hacking: Gaining Access, Privilege Escalation, Maintaining Access, Clearing Logs

Activities:

- Use vulnerability scanners to assess a system
 - Perform a controlled hacking simulation
 - Develop a vulnerability report with mitigation strategies
-

Module 7: Malware Threats & Sniffing Attacks**Topics:**

- Malware Concepts: Trojans, Worms, Fileless Malware
- Malware Analysis and Countermeasures
- Sniffing Techniques: MAC & DHCP Attacks, ARP Poisoning, Spoofing, DNS Poisoning
- Sniffing Tools and Defense Mechanisms

Activities:

- Conduct a malware analysis
 - Use network sniffing tools to monitor traffic
 - Implement countermeasures against sniffing attacks
-

Module 8: Social Engineering & Denial-of-Service Attacks**Topics:**

- Social Engineering Techniques & Countermeasures
- Insider Threats & Identity Theft
- DoS/DDoS Attack Concepts and Techniques
- DoS/DDoS Countermeasures & Mitigation

Activities:

- Perform social engineering simulations
 - Analyze real-world DoS/DDoS attacks
 - Implement defenses against social engineering and DoS attacks
-

Module 9: Advanced Ethical Hacking Techniques**Topics:**

- Session Hijacking Techniques & Countermeasures
- Evading IDS, Firewalls, and Honeypots
- Web Server and Web Application Hacking
- SQL Injection Attacks & Prevention
- Wireless Network Hacking & Security Measures

Activities:

- Conduct an SQL injection attack in a controlled environment
 - Pen-test a wireless network for vulnerabilities
 - Simulate evading security mechanisms
-

Module 10: Emerging Cybersecurity Threats & Trends**Topics:**

- Mobile Platform Hacking (Android & iOS)
- IoT & OT Hacking
- Cloud Security & Container Security
- Cryptography: Encryption, Disk Encryption, Cryptanalysis

Activities:

- Assess security vulnerabilities in IoT devices
- Implement cloud security best practices
- Perform cryptographic encryption and decryption exercises

Final Project: Comprehensive Cybersecurity Assessment

- Perform a full cybersecurity assessment on a simulated environment
- Implement penetration testing techniques
- Develop a security report with recommendations
- Present findings and mitigation strategies
